“PUBLIC SECTOR CAREER PROSPECTS FOR CIVIL ENGINEERING GRADUATES”

The Department of Civil Engineering, in collaboration with the Placement and Training Cell, organized an informative seminar on "Public Sector Career Prospects for Civil Engineering Graduates" on Thursday, 6th March 2025, at 9:30 AM. The session was held at the Swami Bhodhanandha Hall and was led by Mr. Gokul Ramanan, a prominent resource person from CivilianZ.

The seminar aimed to provide students with insights into the numerous career opportunities available for civil engineering graduates in the public sector. Mr. Gokul Ramanan, an expert in the field, took the stage to share valuable information about the various government jobs, recruitment processes, and the growing demand for civil engineers in public infrastructure projects. The session began with an introduction by Ms. Amrutha K, the staff coordinator for the event, who welcomed the speaker and attendees. She emphasized the importance of understanding the vast career opportunities available in the public sector for engineering graduates.

Mr. Gokul Ramanan then took over the presentation, discussing topics such as:

1. Public Sector Job Opportunities for Civil Engineers:

- Public Works Departments (PWD)
- Indian Railways
- National Highways Authority of India (NHAI)
- State and Central Government projects

2. Recruitment Exams and Processes:

- Engineering Services Examination (ESE)
- GATE (Graduate Aptitude Test in Engineering)
- Public Sector Undertakings (PSU) recruitment processes
- Tips for cracking competitive exams

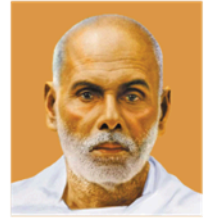

1. Growth and Scope in Public Sector Jobs:

- Job stability and benefits

- Opportunities for career advancement
- Work-life balance and job satisfaction

2. The Role of Civil Engineers in National Development:

- Contributions to infrastructure projects
- Developing sustainable solutions for public welfare

Throughout the seminar, Mr. Ramanan encouraged students to actively pursue these career avenues and advised them on the skills required to succeed in public sector jobs. He also provided valuable tips on preparing for competitive exams and how to stay motivated during the preparation process. The seminar was very interactive, with several students asking questions related to career prospects, job roles, and the recruitment process in the public sector. Mr. Ramanan took the time to address each query and provided practical guidance to help students prepare for their future careers.

The session concluded with a vote of thanks by Ms. Dilsha P, the student coordinator, who expressed gratitude to the speaker for his informative session, as well as to the attendees for their active participation. She also acknowledged the efforts of the staff coordinator and the organizing team for making the event a success.

The seminar was a valuable opportunity for civil engineering students to gain a deeper understanding of the public sector career prospects available to them, helping them make informed decisions about their future endeavors.
