5 DAYS WORKSHOP ON 3D PRINTING

Exclusively For Final Year Students

Key Highlights

- Self Development Design
- 3D Printing Trends
- Challenges in 3D Printing
- Post Processing Operations

13-17 March 2023

9.00 AM - 5.00 PM

5 Day Workshop on 3D Printing, March 13-17, 2023

DAY 1

Date	Time	
13-03-2023 (Monday)	9:00 AM-9:10 AM	Introduction by Coordinator Dr. Sudhin Chandran, Dept. of ME, SNGCET
	9:10 AM-9:15 AM	Departmental address by Mr. Jacob Thomas HoD, Dept. of ME, SNGCET
	9:15 AM-12:00 PM	Expert talk by Dr. Abdul Nazar K P, Associate Professor Dept of Mechanical Engineering, GEC Kannur Title: State of the art of 3D printing application.
	01:00 PM-5:00 PM	Expert talk by Mr. Jacob Thomas Asst. Professor Dept of Mechanical Engineering, SNGCET Title: 3D Printing technology steps, 3D Printing application fields, 3D Printing equipment, 3D Printing approach to build parts and assemblies.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

DAY 2

14-03-2023 (Tuesday)	9:00 AM-12:30 PM	Expert talk by Dr. Abdul Nazar K P, Associate Professor Dept of Mechanical Engineering, GEC Kannur Title: 3D Printing process steps for 3D printing an object, post-processing operations for 3D printed objects.
	01:30 PM-5:00 PM	Expert talk by Mr. Jacob Thomas Asst. Professor Dept of Mechanical Engineering, SNGCET Title: 3D Printing approach to build parts and assemblies, post-processing operations for 3D printed objects.

DAY 3

15-03-2023 (Wednesday)	9:00 AM-12:30 PM	Expert talk by Mr. Pradeepkumar V. Instructor ME, GCE Kannur. Title: 3D Printed Energy Storage Devices for Flexible and Wearable Electronics
	01:30 PM-5:00 PM	Expert talk by Dr. Solamon Joseph, Lecturer ME, GPC Periye, Kasargod. Title: Challenges and advantages of 3D printing.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

Day 4

16-03-2023 (Thursday)	09:00 AM-12:00 PM,	Expert talk by Govardhan Kayarthaya B, Lecturer ME, GPC Periye, Kasargod. Title: Technology Drivers for 3D printing, Knowledge on 3D printer software
	01:00 PM-5:00 PM	Expert talk by Dr. Solamon Joseph, Lecturer ME, GPC Periye, Kasargod. Title: 3D Printing technology, 3D Printing process steps for 3D printing an object.

DAY 5

17-03-2023 (Friday)	9:00 AM-12:30 PM	Expert talk by Govardhan Kayarthaya B, Lecturer ME, GPC Periye, Kasargod. Title: post-processing operations for 3D printed objects.
	01:30 PM-5:00 PM	Expert talk by Mr. Jacob Thomas Asst. Professor Dept of Mechanical Engineering, SNGCET Title: Opportunity to design and print self-developed design.

SYLLABUS FOR 3D PRINTING

Professional Skills(Trade Practical)	Professional Knowledge(Trade Theory)
<ol style="list-style-type: none"> 1. Importance of trade training, List of tools & Machinery used in the trade. 2. First Aid Method and basic training. 3. Safe disposal of waste materials like cotton waste, metal chips/burrs etc. 4. Hazard identification and avoidance. 5. Safety signs for Danger, Warning, caution & personal safety message. 6. Preventive measures for electrical accidents & steps to be taken in such accidents. 7. Use of Fire extinguishers. 8. Practice and understand precautions to be followed while working in fitting jobs. 9. Demonstrate the functions of 3D printing and Scanning. 10. Demonstrate the functions of 3D printing and Scanning. Perform Computer operation: <ol style="list-style-type: none"> i) create new folder, ii) add subfolders, create application files, iv) change appearance of windows, v) search for files, vi) sort files, vii) copy files, viii) create shortcut folder, ix) create shortcut icon in desktop and taskbar x) Move files to and from removable disk/ flash drive. xi) Install a printer from driver software in operating system. 11. Create, save and print a document, worksheet and pdf (portable document format) files. 12. Draw perpendicular, inclined (given angle) and parallel lines. Draw triangles with given sides and angles. 13. Draw inscribed and circumscribed circles of triangle, pentagon and hexagon. 14. Draw orthographic projection of cut section/ frustums of solids- prism, cylinders, cones, pyramids. 	<p>All necessary guidance to be provided to the new comers to become familiar with the working of Industrial Training Institute system including stores procedures.</p> <p>Soft Skills, its importance and Job area after completion of training.</p> <p>Importance of safety and general precautions observed in the industry/shop floor.</p> <p>Introduction of First aid. Operation of electrical mains and electrical safety. Introduction of PPEs. Response to emergencies e.g.; power failure, fire, and system failure.</p> <p>Importance of housekeeping & good shop floor practices. Introduction to 5S concept & its application.</p> <p>Occupational Safety & Health: Health, Safety and Environment guidelines, legislations & regulations as applicable.</p> <p>Introduction to 3D Printing and Scanning. Basic computer: Introduction to computer, Windows operating system, file management system. Computer hardware and software specification.</p> <p>Engineering Drawing: Nomenclature, description and use of drawing instruments & various equipments used in drawing office. Their care and maintenance.</p> <p>Units of dimensioning, System of dimensioning, Method of dimensioning & common features. Methods of obtaining orthographic view. Position of the object, selection of the views, three views of drawing. Planes and their normal projections. Orthographic projection. First angle and third</p>

ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

15. Draw 2D objects using: line, polyline, ray, polygon, circle, rectangle, arc, ellipse commands.

16. Modify 2D objects using Move, Copy, Array, Insert Block, Make Block, Scale, Rotate, Hatch Commands.

17. Perform computer application in 2D drawing space using commands from ribbon, menu bar, toolbars and by typing in command prompt.

18. Modify 2D objects using Move, Copy, Array, Insert Block, Make Block, Scale, Rotate, Hatch Commands.

19. Draw 3D solid figures by Sketching features & applied features.

20. Handle imported geometries using Feature Works – Recognise features to native file formats.

21. Create a 3D transition figure

- Using loft feature.
- Using sweep feature.
- Using library features.

i) Create 3D model by annotating Holes and Threads, ii) Create Centrelines, symbols and leaders, iii) Perform seamless Simulation within CAD Apply loads & boundary conditions, Material should come from part definition, contacts etc and perform base simulation.

iv) Plot various results- Stress, Strain, Deformation, Displacement, Factor of Safety plot, Design Insight plot, probe facility, Isoclippping, Section clipping.

v) Create automatic reports vi) Understand 2D simplification.

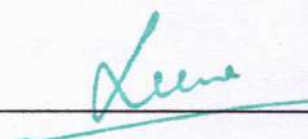

22. Learn Data Translation – Built in translation facility to export design to DWG, DXF, ProE, IPT(Inventor), Mechanical Desktop, Unigraphics, ParaSolid, CADKEY, IGES, STEP, .PAR (SolidEdge), SAT(ACIS), VDA-FS, VRML, STL, TIFF, JPG, Adobe, Rhino, IDF & HSF.(20 hrs)

angle projection. Principal of orthographic projection. Projection of solids like prism, cones, pyramids and their frustums.

Introduction to 2D User interface. Drawing of Line, polyline, ray, polygon, circle, rectangle, arc, ellipse using different options. Trim, Offset, Fillet, Chamfer, Arc and Circle under modify commands. Move, Copy, Array, Insert Block, Make Block, Scale, Rotate, Hatch Commands. Creating templates, Inserting drawings, Layers, Modify Layers. Format dimension style, creating new dimension style, Modifying styles in dimensioning. Writing text on dimension line and on leader. Edit text dimension. Knowledge of shortcut keyboard command. Customization of keyboard command. Customization of drafting settings, changing orthographic snap to isometric snap. Procedure to create viewport in layout space in zooming scale.

3D Modeling and Design Software:

Introduction to 3D Modeling and Software. User interface - Menu Bar – Command manager – Feature manager – Design Tree – settings on the Default options – suggested settings – key board short cuts. Feature manager Design Tree Selection of plane Control of sketches through parameter and property manager. Featured tools in Command Manager Feature Toolbar. Extrude Boss/Base Revolve Boss/Base Swept Boss/Base Lofted Boss/Base Boundary Boss/Base Extruded cut Hole Wizard Revolved Cut Boundary Cut Fillet, chamfer, mirror Linear pattern and circular pattern Understanding part GD&T with DimXpert Manager

Report of the Session on WORKSHOP ON 3D PRINTING

The Department of Mechanical Engineering (ME) and organized the "Workshop on 3D Printing" from March 13th to March 17th 2023, at 10 AM in Mechanical department's seminar hall. The aim of the workshop is to make students aware about concept & importance of 3D printing Technology. The workshop was also attended by the staffs of SNGCET. The session commenced with a welcoming address from the event coordinator, Dr. Sudhin Chandran, Assistant Professor of ME, expressing appreciation to participants and faculties for their whole-hearted support.

The workshop started with welcoming guest by respected Head of the Department Mr. Jacob Thomas. The workshop was divided in two sessions, in first session Dr. Abdul Nazar K P has presented and explained to students about back ground of how 3D printing technology evolved. He also explained about the various types of 3D printing technology available in market and how they differ in printing object. In the Second session, Mr. Jacob Thomas demonstrated on 3D printer which they have brought by 3D printing a small component in printer. While demonstration was going on simultaneously sir has also explained about type of raw material required for 3D printing. Sir also explained that depending upon the raw material how the product quality varies and also cost of the component.

ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

The session focusing on 3D Printing at the workshop proved highly successful, equipping students with knowledge and practical skills for utilizing 3D printers in industrial settings. Participants thoroughly covered all fundamental aspects of 3D printing technology. Exceptionally positive feedback was received from the students regarding their learning experience during the workshop. Such initiatives play a pivotal role in preparing students for the contemporary challenges and opportunities they will encounter. Attendees departed the session with renewed inspiration and a steadfast determination to further refine their concepts, with the aim of making a positive impact on the world through their innovative endeavors. The session, featuring informative presentations and insightful discussions, undoubtedly enriched the academic atmosphere at SNGCET.

PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

SYLLABUS

PCB Design and Fabrication

Day 1: Introduction to PCBs and Basic Design Concepts

Morning Session:

Introduction to Printed Circuit Boards (PCBs): Definition, importance, and applications.

Overview of the PCB design process: From schematic to layout.

Introduction to common PCB design software tools (e.g., Eagle, Altium, KiCad).

Afternoon Session:

Understanding basic design concepts:

PCB layers: Types and functions.

Component placement: Considerations and best practices.

Introduction to routing traces: Signal paths, trace width, and clearance.

Day 2: Advanced PCB Design Techniques

Morning Session:

Understanding PCB layer stack-up: Importance and configuration.

Signal integrity considerations: Impedance matching, signal integrity analysis.

Designing for EMI/EMC compliance: Grounding techniques, signal shielding.

Afternoon Session:

High-speed design principles: Differential pairs, controlled impedance routing.

Design for manufacturability (DFM) guidelines: Design rule checks (DRC), panelization.

Day 3: PCB Design Software Proficiency

Morning Session:

Practical session: Hands-on training with PCB design software.

Familiarization with the user interface, toolbars, and shortcuts.

Creating schematics: Adding components, connecting nets.

Afternoon Session:

Layout design: Placing components, routing traces, ground planes.

Introduction to design constraints and design rules.

Day 4: PCB Fabrication Process

Morning Session:

Overview of the PCB fabrication process: Steps involved from design to finished board.

Understanding Gerber files: Format, layers, and their role in fabrication.

Selection of PCB materials: Types, properties, and considerations.

Afternoon Session:

Design optimization for fabrication: Panelization, copper weight, solder mask considerations.

Introduction to PCB assembly (PCBA): SMT vs. Through-hole, assembly techniques.

Day 5: Hands-On Fabrication and Design Review

Morning Session:

Hands-on practical session: Participants design their PCB layouts using software.

Guidance provided on optimizing designs for fabrication and assembly.

Afternoon Session:

Design review and feedback: Participants present their designs for review and critique.

Discussion on common mistakes and how to avoid them.

Q&A session: Addressing participants' queries and clarifications.

Conclusion and Certificate Distribution.

This 5-days training syllabus provides a structured approach to learning PCB design and fabrication, covering essential concepts, advanced techniques, practical software training, and hands-on experience. Each day focuses on specific aspects of PCB design and fabrication, gradually building participants' skills and knowledge throughout the training program.

ELECTRICAL AND ELECTRONICS ENGINEERING DEPARTMENT

HANDS ON TRAINING ON PCB DESIGN AND FABRICATION

The Department of Electrical and Electronics Engineering conducted five days Hands on training on PCB Design and Fabrication for all students of our college from 30 March 2023 to 03 April 2023. A Total of 10 students participated in the training session. The students gained hands on experience in PCB Design and Fabrication.

The event was inaugurated by Dr. Leena A V, Principal, SNGCET. Welcome address was delivered by Mr. Abhilash Krishnan (HoD, EEE). Mr. Archana C P, (AP. EEE) delivered felicitation speech. Welcome address delivered by Ms. Aswathi PP, Student Coordinator and Mr. Vaishnav TV, student co coordinator delivered vote of thanks.

The 5-days training session was handled by Mr. Sreeraj, the lab instructor EEE.

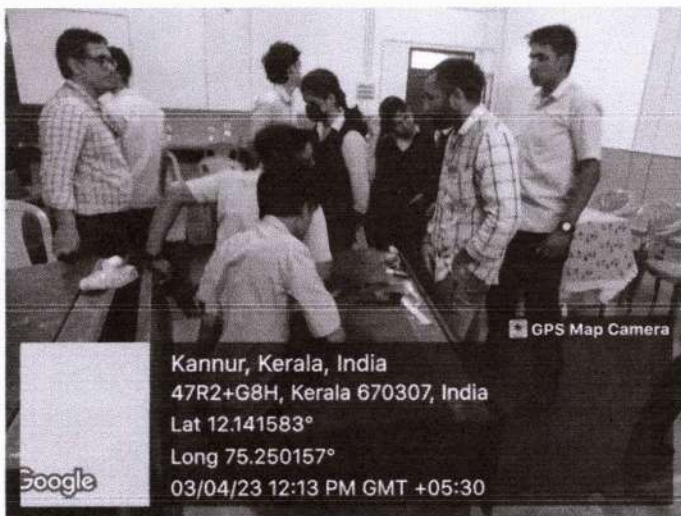

The primary objectives of the training were:

To familiarize participants with the fundamentals of PCB design. To provide practical training on using PCB design software. To educate participants about the PCB fabrication process. To enable participants to create their PCB designs and fabricate them.

Participants gained a comprehensive understanding of PCB design principles and techniques. Hands-on experience enabled participants to create their PCB designs effectively. Participants learned how to optimize designs for fabrication, ensuring manufacturability and reliability. Increased confidence among participants in using PCB design software and submitting designs for fabrication.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

ROBOTICS WORKSHOP

The Department of Electronics and Communication Engineering at Sree Narayana Guru College of Engineering and Technology conducted a robotics workshop for Plus Two students on 02.08.2022 to 06.08.2022. This workshop aimed to provide participants with a comprehensive introduction to robotics, emphasizing Arduino programming and the creation of line-following robots. The event was an overwhelming success, fostering enthusiasm among the students and providing them with invaluable skills and knowledge.

The workshop began with a warm welcome by Leena Narayanan, AP ECE who introduced the participants to the objectives of the workshop, the importance of electronics and robotics, and the exciting prospects of pursuing careers in these fields. The first part of the lesson introduced students to the world of Arduino programming. They gained knowledge of Arduino boards, fundamental programming concepts, and how to connect LEDs, sensors, and actuators to the Arduino platform. The practical portion of the workshop, in which students were charged with creating their own line-following robots, was one of its standout features. The participants meticulously built and programmed their robots under the direction of skilled teachers using kits that contained sensors, motors, and Arduino boards.

WORKSHOP REPORT : FIVE DAY WORKSHOP ON OS INSTALLATION

DATE : 13/3/2023 to 17/03/2023

VENUE : SEMINAR HALL

ORGANIZED BY : TECHKRITI , CSE ASSOCIATION

The five-day workshop on operating system (OS) installation was organized with the aim of providing participants with comprehensive knowledge and hands-on experience in installing operating system and familiarization on hardware components. The workshop covered a range of topics including hardware components, OS fundamentals, preparation for installation, installation procedures for different OS types, troubleshooting common issues, and post-installation configuration.

Day 1: Familiarization of hardware components: - The first day focused on introducing participants on the basics of hardware components of a computer. Students engaged in interactive discussions and activities to reinforce their understanding.

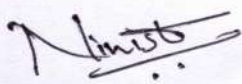

Day 2: Hands on session on hardware components: - On Second day, the students got an hands on session to familiarize the hardware components and students were familiarized with components.

Day 3: - Talk on OS installation: - The third day, a lecture session was given to the students to get to know about the steps and procedure required for installing an OS.

Day 4: - Hands on session on OS installation: -Fourth day was dedicated to the students for practical demonstrations and hands on exercise to ensure them how OS is installed.

Day 5: - Feedback and Response: - Last day of the workshop is provided for an interactive session to get the feedback and responses from both students and resource persons. And an online test was conducted to get the analysis of the workshop.

The five-day workshop on OS installation provides students with a comprehensive understanding of the installation process as well as to get familiarize with hardware components. By combining theoretical concepts with practical hands-on experience, students gained valuable skills that are essential in the IT industry. The workshop received positive feedback from students who expressed satisfaction with the content, delivery, and interactive nature of the sessions.

Difference between system software and application software.

33 responses

System software is essential but application software is not essential

System software provides the platform to execute the program. Application software used to do some specific task .

System software platform depended and application software platform independent

System software provides platform to function to run application software performs the specific task

system software is used to run the system and application software is used to run specific task

System software is used run the system.
Application software is used to perform specific task.

System software runs independently, Application software needs System software to run .

System software is a general purpose software and it is use to run the system
Application software specific purpose software

System Software maintains the system resources and gives the path for application software to run
Application software is built for specific tasks

system software provides foundational services and manages computer hardware and the application software performs specific tasks

A system cannot run without a system software, but system can run without application software

A system cannot run without a system software but system can run without application software.

System cannot run without a system software but system can run without application software.

System cannot run without system software but system can run without application software

System can't run without system software, system can run without application software

System can't run without system software .
Application software to Perform a specific task

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PATTANUR
KANNUR

An application is software that fulfills a specific need or performs tasks. System software is designed to run a computer's hardware and provides a platform for applications to run on top of

Without system software program will not run and without application software program runs.

System software manages and controls the computer hardware. Application software is designed for specific tasks

system software is used to run computer hardware
application software is used to run specific task

idk

System software is the interface between application software and the system. Application software is the type of software that runs as per user request.

Gives path in a software application to run

System software is a software that is designed to run a computer hardware.
Application software is a special software used to run a specific task.

System Software: System software acts as the backbone of a computer system, providing essential functionalities to enable the operation of hardware and other software. It manages the resources and activities of the computer system, including memory management, disk management, process management, and device management. Examples of system software include operating systems (e.g., Windows, macOS, Linux), device drivers, firmware, and utility programs like antivirus software and disk defragmenters. **Application Software:** Application software refers to programs designed to perform specific tasks or provide specific functions for users. It is created to fulfill the needs or requirements of end-users, such as word processors, web browsers, email clients, video games, and productivity software like spreadsheet applications and graphic design tools. Unlike system software, application software is not essential for the functioning of the computer system itself but is used by users to carry out various tasks and activities.

System software is a computer programme designed to run a computer's hardware and application programs

System software is mandatory for computer.
Application software is not mandatory

System can't run without system software. Application software to Perform a specific task

System software - controls basic operations of computer.
Application software - performs specific tasks for users.

System can't run without System software. Application software is used for running specific tasks.

Difference between hardware and software

33 responses

Hardware is touchable software is not touchable

Hardware is the electromechanical device of the computer. Software is anything that tells the hardware what to do and how to do it.

Hardware have physical existence and software dont

Hardware can be touched, software can't

hardware is physical components of the computer and Software is anything that tells hardware what to do and how to do it, including computer programs and apps on your phone.

Hardware physical components of computer.
Software is anything that tells hardware what and how to do.

Hardware is the physical part and software is which instruct the computer how to do these tasks

Hardware is a physical part of the computer
Software is the program which is executed by cpu

Hardware refers to the physical and visible components of the system such as a monitor, CPU, keyboard and mouse whereas software refers to a set of instructions which enable the hardware to perform a specific set of tasks

Software is the data which instructs the hardware to perform certain tasks and the hardware is a physical component

Hardware -physical part of computer.
Software - set of programs to perform specific task.

Hardware is the physical part of a computer. Software is a set of program for performing a specific task.

Hardware is the physical part of the computer. Software is the set of program to perform specific task

Hardware is physical part of the computer and software is set of program to perform specific task

Hardware is the physical part of a computer , software is the set of programs to specific tasks

Hardware is a Physical part of a computer.
Software is set instruction to perform specific task.

Hardware is any element of a computer that's physical. This includes things like monitors, keyboards, and also the insides of devices, like microchips and hard drives. Software is anything that tells hardware what to do and how to do it, including computer programs and apps on your phone

Hardware is the part something we can touch .

Hardware refers to the physical components of a computer system that we can touch. Software refers to the programs and instructions that run on the hardware

hardware is the physical part of the computer system
software is the set of instruction used to run the computer system

idk

Hardware is physical components of a computer. Software is a collection of instructions.

Hardware is a physical part of the computer, it can be touched. Software it cannot be touched

Hardware is the physical component of the computer which we can touch and feel. software is a set of instruction or programs which can be used to perform specific task.

Hardware refers to the physical components of a computer system, such as the processor, memory, hard drive, and peripherals like keyboards and monitors. In contrast, software refers to the programs and instructions that tell the hardware what to do, including operating systems, applications, and utility programs. Hardware is tangible and can be touched, while software is intangible and exists as code stored on hardware.

Hardware is any element of a computer that's physical and software is anything that tells hardware what to do and how to do it

Hardware is touchable parts
Software is not touchable

Hardware is a Physical part of a computer. Software is set instruction to perform specific task.

Hardware - physical components such as the monitor, keyboard, mouse etc.
Software - programs and instructions that tell the hardware what to do, including operating systems, applications, and games.

Hardware is a physical part of computer, and software is a set of instructions to run tasks.

Hardware is a physical part of a computer.
Software is set of instruction to perform specific task

Software is the set of instructions to perform specific task.
Hardware is the physical part of computer.

Report on Advanced Quantity Surveying Workshop

Conducted by the Department of Civil Engineering

Date: 02/05/2023 - 06/05/2023

Venue: CE Seminar Hall,

Sree Narayana Guru College of Engineering & Technology

The Department of Civil Engineering at Sree Narayana Guru College of Engineering & Technology Payyanur organized a comprehensive 5-day hands-on training program on Advanced Quantity Surveying. The workshop was designed to equip participants with practical skills and knowledge in quantity surveying techniques applicable in real-world construction projects. The main objective of the workshop are to familiarize participants with advanced techniques in quantity surveying, to provide hands-on training in utilizing modern tools and software for quantity estimation, to enhance participants' understanding of cost management and budgeting in construction projects and to facilitate networking and collaboration among participants and industry experts. The training program spanned five days and included a mix of theoretical sessions, practical exercises, and interactive workshops. Each day focused on specific aspects of quantity surveying, ensuring a comprehensive understanding of the subject matter.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

Day 1: Fundamentals of Quantity Surveying

Introduction to quantity surveying principles and practices.

Measurement techniques and standards.

Overview of construction drawings and specifications.

Day 2: Advanced Measurement Techniques

Advanced measurement methods for various construction elements.

Practical exercises using measurement tools and software.

Day 3: Cost Estimation and Analysis

Principles of cost estimation.

Understanding of rate analysis and bill of quantities.

Practical session on preparing accurate cost estimates.

Day 4: Software Applications in Quantity Surveying

Introduction to software tools for quantity surveying.

Hands-on training in popular quantity surveying software.

Day 5: Case Studies and Project Presentations

Analysis of real-world case studies in quantity surveying.

Group presentations of project assignments.

Interactive session with industry experts.

The 5-day hands-on training program on Advanced Quantity Surveying was highly successful in achieving its objectives. Participants gained valuable insights into advanced quantity surveying techniques, modern tools, and software applications. The practical exercises and interactive sessions facilitated a deeper understanding of cost estimation, measurement techniques, and project management in construction.

The Department of Civil Engineering expresses gratitude to all participants and faculty members, who contributed to the success of the training program. We

Dr. LEENA A. V.

5 DAY ONLINE WORKSHOP ON ADDITIVE MANUFACTURING

SYLLABUS

Day 1: Introduction to Additive Manufacturing

- Overview of Additive Manufacturing (AM) technologies
- Historical development and current trends in AM
- Types of 3D printing processes (FDM, SLA, SLS, etc.)
- Basic principles of CAD modeling for 3D printing

Day 2: AM Technologies and Materials

- In-depth look at different AM technologies (FDM, SLA, SLS, DMLS, etc.)
- Selection criteria for choosing appropriate AM technology
- Materials used in additive manufacturing (polymers, metals, ceramics)
- Material properties and their impact on print quality and applications

Day 3: Design for Additive Manufacturing (DFAM)

- Principles of Design for Additive Manufacturing (DFAM)
- Design guidelines and considerations for AM
- Optimizing designs for strength, weight reduction, and functionality
- Designing for support structures and post-processing considerations

Day 4: Advanced AM Topics

- Post-processing techniques (cleaning, curing, heat treatment, finishing)
- Quality control and inspection methods for AM parts
- Simulation tools for predicting AM outcomes
- Integration of AM with traditional manufacturing processes (hybrid manufacturing)

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

Day 5: Industrial Applications and Future Directions

- Industry-focused case studies showcasing successful integration of AM in production workflows.
- Regulatory considerations and standards for AM in critical sectors (e.g., medical devices, aerospace).
- Closing remarks, certificate distribution, and networking opportunities.

5 DAY ONLINE WORKSHOP REPORT ON ADDITIVE MANUFACTURING

The Department of Mechanical Engineering (ME) conducted the "Workshop on Additive Manufacturing" from October 18th to October 22th, 2021, commencing at 9 AM in the seminar hall of the Mechanical department. This workshop was tailored for final year mechanical students and was also attended by staff members from SNGCET. Due to COVID 19 outbreak the workshop was conducted through google meet.

The event began with a welcoming address from Mr. Manuraj T V, Assistant Professor of ME and the event coordinator, who expressed gratitude to all participants and faculty members for their enthusiastic support.

Mr. Chandrajith E, the esteemed Head of the Department, extended a warm welcome to kick off the workshop. Expert insights were shared by Dr. Abdul Nazar K P, Dr. Solamon Joseph, and Mr. Jacob Thomas.

Over the course of five days, the workshop aimed to equip participants with comprehensive knowledge and practical skills in the field of 3D printing technologies, covering technology fundamentals, materials, design considerations, advanced topics, and hands-on experience.

The initial day focused on introducing participants to additive manufacturing, covering the history and evolution of 3D printing technologies, as well as the various types of AM processes. Participants gained understanding of different 3D printing technologies and learned how to select the appropriate one based on project requirements. Material aspects of additive manufacturing, including properties and their impact on print quality and applications, were also discussed.

The Additive Manufacturing Workshop was deemed successful, with participants gaining a solid understanding of 3D printing technologies and practical skills in designing and manufacturing parts using additive techniques. Positive feedback was received from attendees, highlighting the value of hands-on experience and the comprehensive coverage of AM topics. Participants departed the workshop equipped to apply additive manufacturing principles in their respective fields, contributing to the ongoing advancement of this rapidly evolving technology.

LED Bulb Manufacturing with Soldering Practice

Introduction

An LED lamp or LED light bulb is an electric light for use in light fixtures that produces light using one or more light-emitting diodes (LEDs). LED lamps have a lifespan many times longer than equivalent incandescent lamps, and are significantly more efficient than most fluorescent lamps, with some LED chips able to emit up to 303 lumens per watt (as claimed by Cree and some other LED manufacturers). However, LED lamps require an electronic LED driver circuit when operated from mains power lines, and losses from this circuit mean the efficiency of the lamp is lower than the efficiency of the LED chips it uses. The most efficient commercially available LED lamps have efficiencies of 200 lumens per watt (Lm/W).

Similar to incandescent lamps (and unlike most fluorescent lamps), LEDs come to full brightness immediately with no warm-up delay. Frequent switching on and off does not reduce life expectancy as with fluorescent lighting. Light output decreases gradually over the lifetime of the LED (see Efficiency droop section).

Some LED lamps are made to be a directly compatible drop-in replacement for incandescent or fluorescent lamps. LED lamp packaging may show the light output in lumens, the power consumption in watts, the colour temperature in Kelvin or a colour description such as "warm white", "cool white" or "daylight", the operating temperature range, and sometimes the equivalent wattage of an incandescent lamp delivering the same output in lumens.

Flow of Current

LEDs run on direct current (DC), whereas mains current is alternating current (AC) and usually at much higher voltage than the LED can accept. LED lamps can contain a

circuit for converting the mains AC into DC at the correct voltage. These circuits contain rectifiers, capacitors, and may have other active electronic components, which may also permit the lamp to be dimmed. In an LED filament lamp, the driving circuit is simplified because many LED junctions in series have approximately the same operating voltage as the AC supply.

Description of LED Bulb Machine

Machinery for LED Bulb Unit includes the following:

- Tikki Making Machine
- Punching Machine
- Cutter
- Iron
- Solder
- Nuts
- Paste

These machines are used to produce LED Bulb substance from the raw material. With the help of this machine the work of punching, cutting, pasting completes in a very short span.

LED Bulb Manufacturing Process

- Take Body & diffuser of Bulb separately.
- Adjust in the tikki machine
- Now soldering the PCB with diffuses wire.
- Cut the extra wire in the PCB unit.
- Put B22 cap on the PCB
- Now press it with punching machine.
- Packaging
- Transport.

Training Objectives:

Understanding LED Technology: Participants were introduced to the fundamentals of LED technology, including the working principles, components, and advantages over traditional lighting sources.

Hands-on Soldering Practice: A significant portion of the training program was dedicated to hands-on soldering practice. Participants worked with actual LED components, circuit boards, and soldering equipment to gain practical experience in soldering connections.

Manufacturing Processes: The training program covered the entire manufacturing process of LED bulbs, from component assembly to final product testing. This included soldering techniques, PCB (Printed Circuit Board) assembly, and encapsulation methods.

Safety Practices: Safety is a top priority in any manufacturing environment. Participants received comprehensive training on safety protocols, including handling of hazardous materials, use of protective equipment, and emergency procedures.

Efficiency and Optimization: Participants learned about lean manufacturing principles and techniques to optimize production processes, minimize waste, and improve overall efficiency.

Training Methodology:

The training program employed a combination of theoretical instruction, demonstrations, and extensive hands-on practice sessions. Participants were provided with soldering stations equipped with soldering irons, solder, flux, and other necessary tools. Experienced instructors supervised the soldering practice and provided feedback and guidance to participants.

Programme Outcomes

After the courses the candidate will learn

- Enhanced understanding of LED technology and its applications.
- Proficiency in various soldering techniques used in LED bulb manufacturing.
- Hands-on experience in soldering connections on LED components and circuit boards.
- Understanding of quality control standards and inspection techniques for soldered joints.
- Ability to troubleshoot and rectify common soldering issues effectively.
- Hands-on experience on LED Bulb Assembling and repairing
- To understand, various electronic & electrical components, materials and their specific properties & usages.

SYLLABUS

Day 1: Introduction to LED Technology and Soldering Basics

• Morning Session:

Basics of Electricity and Electronics

Introduction to LED technology: principles, components, and applications.

Use of Tools & Soldering Process.

Overview of soldering: types of solder, flux, soldering equipment.

Afternoon Session:

Demonstration: through-hole soldering technique.

Hands-on practice: through-hole soldering exercises.

Day 2: Surface Mount Soldering and Quality Control

Morning Session:

Surface mount soldering: techniques and considerations.

Quality control in soldering: visual inspection standards and defect identification.

Understand the functionality of multi-meter, Explain different modes of testing in multi-meter.

Afternoon Session:

Demonstration: surface mount soldering technique.

Hands-on practice: surface mount soldering exercises.

Day 3: Advanced Soldering Techniques and Troubleshooting

Morning Session:

Advanced soldering techniques: reflow soldering, desoldering, and component replacement.

Troubleshooting soldering issues: common problems and solutions.

PCB Design.

Afternoon Session:

Practical exercises: troubleshooting soldering issues on sample boards.

Day 4: LED Bulb Manufacturing Process

Morning Session:

Overview of LED bulb manufacturing process: component assembly, PCB assembly

Safety considerations in LED bulb manufacturing.

Afternoon Session:

Demonstration: LED bulb manufacturing process.

Lean manufacturing principles: optimizing production processes and minimizing waste.

Day 5: Optimization, Efficiency, and Final Assessment

Morning Session:

Hands-on practice: assembling LED bulbs with soldered connections and testing

Afternoon Session:

Hands-on practice: assembling LED bulbs with soldered connections and testing

Feedback session: review of individual performance and areas for improvement.

Certification ceremony: distribution of training completion certificates.

Note: Each day will include breaks for refreshments and rest to ensure participants remain engaged and focused throughout the training program. Additionally, instructors will provide continuous guidance and support during hands-on practice sessions to maximize learning outcomes.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

**REPORT ON LED BULB MANUFACTURING & SOLDERING PRACTICE
TRAINING PROGRAM**

The Department of Electrical and Electronics Engineering conducted Five days LED manufacturing training session and soldering practice for students of Electrical and Electronics Engineering from 8/10/2021 to 12/10/2021. A Total of 10 students participated in the training session. The students gained hands on experience in manufacturing LED bulb.

The event was inaugurated by Dr. Leena A V, Principal, SNGCET. Welcome address was delivered by Mr. Abhilash Krishnan (HoD, EEE). Dr. Susan Ebraham (Dean Academics) and Mr. Manu C (AP, EEE) delivered felicitation speech and Ms. Anusha Jyothi, student coordinator delivered vote of thanks. The inaugural session concluded at 10:00 a.m., after which the training session started.

The objective of the 5-days LED manufacturing and soldering practice training program was to provide participants with a comprehensive understanding of LED technology, manufacturing processes, soldering techniques, quality control measures, and troubleshooting methods. Through a combination of theoretical sessions and hands-on practical exercises, the program aimed to equip participants with the necessary skills to excel in LED manufacturing environments.

Participants developed a solid understanding of LED technology, manufacturing processes, and soldering techniques. Hands-on practice enabled participants to gain confidence in handling soldering equipment and performing assembly tasks. Quality control and testing training equipped participants with the ability to identify defects and ensure product quality. Advanced techniques and troubleshooting sessions prepared participants to tackle complex manufacturing issues effectively.

The 5-days LED manufacturing and soldering practice training program successfully provided participants with a well-rounded skill set essential for thriving in LED manufacturing environments. By combining theoretical knowledge with practical experience, participants are now equipped to contribute effectively to the production of high-quality LED products. Continued practice and refinement of these skills will further enhance participants' capabilities in this field.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

SYLLABUS

Introduction to Arduino	History and background. Overview of Arduino boards (Uno, Nano, Mega, etc.). Applications of Arduino in various fields (IoT, robotics, automation, etc.)
Basic Electronics Components	Explanation of fundamental components. Resistors, capacitors, LEDs, pushbuttons, etc. Understanding component specifications (resistance, capacitance, voltage ratings, etc.) Safety precautions in handling electronic components
Introduction to Breadboards	Explanation of breadboard layout and connections. Hands-on activity: Building simple circuits on a breadboard
Hands-on Arduino Basics	Introduction to Arduino IDE (Integrated Development Environment) Setting up Arduino IDE on participants system. Uploading a simple "Hello World" program to Arduino board. Understanding the basic structure of an Arduino sketch (setup() and loop() functions)
Hands-on Activity: Blinking an LED	Wiring an LED to Arduino board. Writing a program to blink the LED on and off. Uploading and testing the program on Arduino board
Serial Communication	Introduction to serial communication and its importance in Arduino projects. Sending data from Arduino to computer via serial monitor .Reading data from serial monitor
Introduction to Sensors	Overview of common sensors used with Arduino (temperature, humidity, light, motion, etc.). Working principles of sensors. Hands-on activity: Interfacing a temperature sensor with Arduino
Reading Analog Sensor Data	Understanding analog-to-digital conversion (ADC). Reading analog sensor data using Arduino .Calibrating sensors and mapping sensor values
Introduction to Actuators	Overview of different types of actuators (motors, servos, relays, etc.). Working principles and applications of actuators
Hands-on Activity: Controlling a DC Motor	Introduction to motor drivers and H-bridge circuits. Wiring and controlling a DC motor using Arduino
Introduction to Pulse Width Modulation (PWM)	Explanation of PWM and its application in motor speed control. Hands-on activity: Controlling motor speed using PWM signals
Serial Communication	Review of serial communication basics. Hands-on activity: Implementing two-way communication between Arduino and computer
Functions and	Introduction to functions in Arduino programming. Writing and using

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

Libraries	custom functions. Introduction to Arduino libraries and their usage
Troubleshooting and Debugging	Common programming errors and hardware issues. Strategies for troubleshooting and debugging Arduino projects. Hands-on activity: Identifying and fixing common errors in sample projects
Project Planning and Implementation	Brainstorming and planning individual or group projects. Gathering required components and materials Building and testing projects with guidance from instructors
Project Presentation	Each participant/group demonstrates their project to the rest of the workshop attendees. Explanation of project concept, components used, and functionality. Q&A session and feedback from instructors and peers

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Report on Five Days Workshop on Arduino Basics with Hands-On Training

Date: June 6th, 2022 - June 10th, 2022

The Department of Electronics and Communication Engineering of SNGCET Payyanur organized a comprehensive five-day workshop aimed at introducing plus two pass students to the fundamentals of Arduino programming and basic electronics. The workshop, conducted from June 6th to June 10th, 2022, served to foster interest in electronics and provide hands-on experience with Arduino, a popular open-source hardware and software platform. Ms. Meera M and Ms. Leena Narayanan led the instructional sessions, while Mr. Shahith P. conducted the hands-on sessions, ensuring a balanced approach to theoretical learning and practical application.

Workshop Objectives:

1. Introduce students to the basics of Arduino and its applications in various fields.
2. Provide hands-on experience in building circuits and programming with Arduino.
3. Foster interest in electronics and inspire students to explore further studies or careers in the field.
4. Raise awareness about advanced technologies and their potential impact on society and industries.

The workshop commenced with an introductory session led by Ms. Meera M and Ms. Leena Narayanan, providing an overview of Arduino, its history, and its applications. Basic electronic components such as resistors, LEDs, and breadboards were introduced, along with safety precautions. Participants were guided through setting up the Arduino IDE and uploading a simple sketch to the Arduino board. A hands-on activity involved blinking an LED to demonstrate basic programming concepts.

Ms. Meera M and Ms. Leena Narayanan delved into the world of sensors and actuators, discussing their types, working principles, and applications. Participants learned to interface temperature sensors with Arduino and read analog sensor data. The session also covered actuators, including DC motors and servos, with a focus on controlling motor speed using PWM signals. Hands-on activities enabled participants to gain practical experience in sensor interfacing and motor control.

On the third day, Ms. Meera M and Ms. Leena Narayanan explored communication protocols such as serial communication. The importance of serial communication in Arduino projects was emphasized, followed by practical demonstrations of interfacing Arduino Wireless communication technologies, including Bluetooth and Wi-Fi, were introduced, broadening participants' understanding of communication protocols and their applications.

The focus of the fourth day was on advanced Arduino programming concepts, led by Ms. Meera M and Ms. Leena Narayanan. Participants learned about functions, libraries, and their usage in Arduino programming, followed by practical exercises in integrating third-party libraries for additional functionality. Troubleshooting and debugging techniques were demonstrated, with hands-on practice to identify and fix common errors in Arduino projects.

The final day of the workshop was dedicated to project building and presentation. Under the guidance of Ms. Meera M, Ms. Leena Narayanan, and Mr. Shahith P., participants worked on individual or group projects, applying the knowledge and skills acquired during the workshop. Assistance and support were provided as needed to ensure successful project completion. In the afternoon

session, participants presented their projects, showcasing their creativity and technical prowess. The presentations were followed by feedback and discussions, allowing participants to reflect on their work and learn from each other's experiences.

The Arduino workshop conducted by the Department of Electronics and Communication Engineering at SNGCET Payyanur was a resounding success, achieving its objectives of introducing students to Arduino programming and basic electronics while fostering interest in the field. Through a combination of theoretical lectures, hands-on activities, and project-based learning, participants gained valuable skills and practical experience, paving the way for further exploration and growth in the field of electronics. Special thanks to Ms. Meera M, Ms. Leena Narayanan, and Mr. Shahith P. for their dedication and expertise in delivering an enriching learning experience.

Participant feedback was overwhelmingly positive, with many expressing their appreciation for the workshop's interactive and engaging format. Participants praised the instructors for their clear explanations and hands-on approach, stating that they felt more confident in working with Arduino and electronics after attending the workshop. Several participants expressed their desire to pursue further studies or careers in electronics and related fields, indicating the workshop's success in inspiring and motivating them to explore new opportunities.

WORKSHOP REPORT: - FIVE DAYS WORKSHOP ON LEARN LATEX

DATE: - 16/05/2022 to 20/05/2022

VENUE: - MEETING HALL & NETWORKING LAB

The five-day workshop on learning LaTeX was organized with the aim of introducing participants to the LaTeX typesetting system widely used in academic and scientific writing. The workshop covered various aspects of LaTeX, including document formatting, mathematical typesetting, referencing, and advanced features.

Day 1: Introduction to LaTeX

The first day of the workshop focused on introducing participants to LaTeX and its advantages over traditional word processors. Basic document structure, including document classes, packages, and the LaTeX syntax, was covered. Participants learned how to set up a LaTeX environment on their computers and began creating simple documents.

Day 2: Document Formatting

On the second day, the workshop delved deeper into document formatting using LaTeX. Topics included text formatting (such as fonts, styles, and alignment), page layout (margins, headers, and footers), and creating lists, tables, and figures within LaTeX documents. Participants practiced formatting exercises to reinforce their learning.

Day 3: Mathematical Typesetting

Mathematical typesetting is one of LaTeX's strengths, and day three was dedicated to mastering this aspect. Participants learned how to write mathematical equations using LaTeX syntax, including inline math, display math, matrices, and special symbols. Practical examples and exercises helped participants gain confidence in typesetting mathematical content.

Day 4: Referencing and Citations

The fourth day focused on managing references and citations in LaTeX documents. Participants learned about bibliography management using BibTeX or BibLaTeX, citing sources within the text, and generating a bibliography. Advanced topics such as creating custom citation styles and managing multiple bibliographies were also covered.

Day 5: Advanced LaTeX Features

The final day of the workshop explored advanced features of LaTeX. Topics included creating templates, customizing document layouts, using packages for specialized tasks (e.g., graphics, algorithms), and collaborating on LaTeX projects using version control systems like Git. Participants also learned about online resources and communities for LaTeX users.

The workshop received positive feedback from participants, who appreciated the hands-on approach, clear explanations, and practical exercises. Many expressed confidence in using LaTeX for their future academic and professional writing projects. The organizing committee thanked the participants, instructors, and sponsors for making the workshop a success and encouraged continued exploration of LaTeX's capabilities.

Overall, the five-day workshop on learning LaTeX was a valuable learning experience for participants, equipping them with essential skills for producing high-quality documents in various fields.

ASSESSMENT AND FEEDBACK FORM

1. What is the purpose of LaTeX in document preparation?

- a) To create spreadsheets
- ☒ b) To typeset complex documents with mathematical equations & technical content
- c) To edit images and graphics
- d) To create animations

2. Which command is used to compile a LaTeX document into a PDF format?

- ☒ a) pdftex
- b) latexmk
- c) compilelatex
- d) maketex

3. Which LaTeX environment is suitable for writing research papers, reports, and academic articles?

- ☒ a) article
- b) book
- c) memoir
- d) report

4. Were the workshop topics relevant and informative?

- a) Very Relevant
- b) Relevant
- ☒ c) Somewhat Relevant
- d) Not Relevant

5. Which topics did you find most valuable or interesting?

- ☒ a) Introduction to LaTeX
- b) Document Formatting
- c) Mathematical Typesetting
- d) Referencing and Citations
- e) Advanced LaTeX Features

6. How would you rate the instructors' knowledge and expertise in teaching LaTeX?

- a) Excellent
- ☒ b) Very Good
- c) Good
- d) Fair
- e) Poor

FIVE DAYS WORKSHOP ON LEARN LATEX

ASSESSMENT AND FEEDBACK FORM

1. What is the purpose of LaTeX in document preparation?
 - a) To create spreadsheets
 - b) To typeset complex documents with mathematical equations & technical content
 - ☒ c) To edit images and graphics
 - d) To create animations
2. Which command is used to compile a LaTeX document into a PDF format?
 - ☒ a) pdftex
 - b) latexmk
 - c) compilelatex
 - d) maketex
3. Which LaTeX environment is suitable for writing research papers, reports, and academic articles?
 - ☒ a) article
 - b) book
 - c) memoir
 - d) report
4. Were the workshop topics relevant and informative?
 - a) Very Relevant
 - ☒ b) Relevant
 - c) Somewhat Relevant
 - d) Not Relevant
5. Which topics did you find most valuable or interesting?
 - a) Introduction to LaTeX
 - b) Document Formatting
 - ☒ c) Mathematical Typesetting
 - d) Referencing and Citations
 - e) Advanced LaTeX Features
6. How would you rate the instructors' knowledge and expertise in teaching LaTeX?
 - a) Excellent
 - b) Very Good
 - ☒ c) Good
 - d) Fair
 - e) Poor

Dr. LEENA A. V.

FIVE DAYS WORKSHOP ON LEARN LATEX

ASSESSMENT AND FEEDBACK FORM

1. What is the purpose of LaTeX in document preparation?

- a) To create spreadsheets
- ☒ b) To typeset complex documents with mathematical equations & technical content
- c) To edit images and graphics
- d) To create animations

2. Which command is used to compile a LaTeX document into a PDF format?

- a) pdftex
- ☒ b) latexmk
- c) compilelatex
- d) maketex

3. Which LaTeX environment is suitable for writing research papers, reports, and academic articles?

- a) article
- b) book
- ☒ c) memoir
- d) report

4. Were the workshop topics relevant and informative?

- a) Very Relevant
- ☒ b) Relevant
- c) Somewhat Relevant
- d) Not Relevant

5. Which topics did you find most valuable or interesting?

- a) Introduction to LaTeX
- b) Document Formatting
- c) Mathematical Typesetting
- d) Referencing and Citations
- ☒ e) Advanced LaTeX Features

6. How would you rate the instructors' knowledge and expertise in teaching LaTeX?

- ☒ a) Excellent
- b) Very Good
- c) Good
- d) Fair
- e) Poor

WORKSHOP ON ADVANCED QUANTITY SURVEYING

(04/04/2022 to 08/04/2022)

SYLLABUS

1. GENERAL

- a) Tender Documents
- b) Drawings
- c) Civil & Mep Dwgs
- d) Architectural Drawing
- e) Structural Drawing

Column Layout, Foundation Layout, Tie beam Layout/Gf, Layout First Floor
Frame Layout, Roof Frame, Layout Structural Details: Rein & Size

- f) Items Concrete
- g) Scope Of Works Civil Contractor
- h) Foundations
- i) Beams

2. COST

- a) Material Cost
- b) Unit Cost
- c) Labour Cost
- d) Project Cost
- e) Cost Variance

3. FUNDAMENTALS OF QUANTITY SURVEYING

4. ADVANCED MEASUREMENT TECHNIQUES

5. COST ESTIMATION AND ANALYSIS

6. SOFTWARE APPLICATIONS IN QUANTITY SURVEYING

7. CASE STUDIES AND PROJECT PRESENTATIONS

8. COMPOUND WALL SEQUENCE

- a. Excavation.
- b. Compaction
- c. Roadbase
- d. Compaction

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

- e. PCC
- f. Foundation
- g. Neck Columns
- h. Solid blocks
- i. Tie Beams
- j. Bitumen
- k. Backfilling
- l. Hollow Block Works
- m. Stiffener Columns
- n. Coping Beam
- o. Plastering

9. WATER TANK

- a) Water Tank Materials
- b) Water Tank Man
- c) Machinery
- d) Sequence Water Tank
- e) Common Mistakes Reinforcement

10. BLOCK WORKS

- a) Thermal Insulated
- b) Hollow Blocks
- c) Solid Blocks
- d) Horlly Blocks
- e) Autoclaved Aerated Block
- f) Bed Joint

5-Day Hands-On Training on Cost Estimation & Valuation Technologies

Date: 04/04/2022 - 08/04/2022

Venue: Civil Seminar Hall, SNGCET Payyanur

The Department of Civil Engineering at SNGCET Payyanur conducted a comprehensive 5-day hands-on training program on Cost Estimation & Valuation Technologies. The primary objective of this program was to provide participants with practical knowledge and skills in advanced quantity surveying techniques that are essential for effective project management in the construction industry.

Program Highlights:

Day 1: Fundamentals of Quantity Surveying (04/04/2022)

The training commenced with an overview of quantity surveying principles and methodologies. Participants were introduced to measurement techniques and standards commonly used in the field. The session also covered an overview of construction drawings and specifications.

Day 2: Advanced Measurement Techniques (05/04/2022)

Participants delved into advanced measurement methods for various construction elements. Practical exercises were conducted using measurement tools and software to enhance understanding and proficiency in measurement techniques.

Day 3: Cost Estimation and Analysis (06/04/2022)

The focus shifted to cost estimation and analysis. Principles of cost estimation and budgeting in construction projects were discussed in detail. Participants learned about rate analysis, bill of

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

quantities, and engaged in practical sessions to prepare accurate cost estimates.

Day 4: Software Applications in Quantity Surveying (07/04/2022)

An introduction to software tools relevant to quantity surveying, including AutoCAD and Excel, was provided. Participants received hands-on training in popular quantity surveying software, enabling them to utilize these tools effectively in their projects.

Day 5: Case Studies and Project Presentations (08/04/2022)

The final day featured the analysis of real-world case studies in quantity surveying. Participants worked in groups to analyze and present project assignments, incorporating the knowledge and skills acquired throughout the training program. An interactive session with industry experts provided valuable feedback and insights.

Ms. Swathi P and Mr. Premanand C (AP CE) efficiently coordinated the program, ensuring its smooth execution. Their dedication and expertise greatly contributed to the success of the training. Ms. Dilsha and Mr. Amal P R, student coordinators from S8 CE, played a pivotal role in organizing and managing various aspects of the program. Their enthusiasm and commitment were instrumental in creating a conducive learning environment.

The 5-day hands-on training program on Cost Estimation & Valuation Technologies proved to be highly beneficial for all participants. They gained practical skills and knowledge essential for proficient quantity surveying and project management in the construction sector. The Department of Civil Engineering expresses gratitude to all faculty members, coordinators, and participants for their active involvement and contribution to the success of the program.

5Day Online Workshop on RENEWABLE ENERGY: PATHWAYS AND TECHNOLOGIES, February 15-19, 2021

DAY 1

Date	Time	
15-02-2021 (Monday)	9:00 AM-9:15 AM	Introduction by Coordinator Mr. Manuraj T V, Dept. of ME, SNGCET
	9:15 AM-9:25 AM	Departmental address by Mr. Chandrajith E HoD, Dept. of ME, SNGCET
	9:30 AM-12:30 PM	Expert talk by Mr. Lipin K Assistant Professor, Dept of ME, SNGCET Title: Introduction to Renewable Energy (Overview of Renewable Energy Sources, Importance of Renewable Energy in Sustainable Development)
	01:30 PM-5:00 PM	Expert talk by Mr. Lipin K Assistant Professor, Dept of ME, SNGCET Title: Introduction to Renewable Energy (Solar Energy Technologies, Photovoltaic (PV))

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KARNATAKA

DAY 2

16-02-2021 (Tuesday)	9:00 AM-12:30 PM	Expert talk by Mr. Aswin P Assistant Professor, Dept of ME, SNGCET Title: Wind and Hydroelectric Power (Wind Energy Fundamentals, Wind turbine technology and design, Offshore vs onshore wind farms, Introduction to Hydroelectric Power, Types of hydroelectric systems)
	01:30 PM-5:00 PM	Expert talk by Mr. Aswin P Assistant Professor, Dept of ME, SNGCET Title: Wind and Hydroelectric Power (Small Hydropower and Micro-Hydro Systems, Wind and Hydro Energy Integration in Power Grids, Case Study: Wind Farm or Hydroelectric Project Analysis)

DAY 3

17-02-2021 (Wednesday)	9:00 AM-12:30 PM	Expert talk by Mr. Manuraj T V Assistant Professor, Dept of ME, SNGCET Title: Bioenergy and Geothermal Energy (Bioenergy Overview, Biomass sources and conversion technologies, Biogas production and applications, Geothermal Energy Basics, Geothermal heat pumps, Geothermal power generation).
	01:30 PM-5:00 PM	Expert talk by Mr. Manuraj T V Assistant Professor, Dept of ME, SNGCET Title: Bioenergy and Geothermal Energy (Environmental and Social Impacts of Bioenergy, Geothermal Exploration and Reservoir Engineering.)

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

DAY 4

18-02-2021 (Thursday)	09:00 AM-12:00 PM,	Expert talk by Mr. Chandrajith E HoD, Dept. of ME, SNGCET Title: Energy Storage and Grid Integration (Importance of Energy Storage in Renewable Energy Systems, Battery Technologies for Grid-Scale and Off-Grid Applications, Overview of Pumped Hydro Storage and Other Storage Methods.)
	01:00 PM-5:00 PM	Expert talk by Mr. Chandrajith E HoD, Dept. of ME, SNGCET Title: Energy Storage and Grid Integration (Smart Grid Technologies and Demand Response, Grid Integration Challenges and Solutions, Case Studies on Successful Renewable Energy Grid Integration.)

DAY 5

19-02-2021 (Friday)	9:00 AM-12:30 PM	Expert talk by Mr. Lipin K Assistant Professor, Dept of ME, SNGCET Title: Policy, Economics, and Future Trends (Renewable Energy Policies and Incentives, Financing Renewable Energy Projects, Techno-Economic Analysis of Renewable Energy Systems.)
	01:30 PM-5:00 PM	Expert talk by Mr. Lipin K Assistant Professor, Dept of ME, SNGCET Title: Policy, Economics, and Future Trends (Emerging Trends in Renewable Energy Research and Development, Role of Innovation and Entrepreneurship in Renewable Energy.)

5 DAY ONLINE WORKSHOP ON RENEWABLE ENERGY: PATHWAYS AND TECHNOLOGIES

SYLLABUS

Day 1: Introduction to Renewable Energy

Morning Session

- Overview of Renewable Energy Sources
- Importance of Renewable Energy in Sustainable Development
- Global Energy Trends and Renewable Energy Targets

Afternoon Session

- Solar Energy Technologies
- Photovoltaic (PV) systems
- Concentrated Solar Power (CSP)
- Hands-on Activity: Solar PV System Design Exercise

Day 2: Wind and Hydroelectric Power

Morning Session

- Wind Energy Fundamentals
- Wind turbine technology and design
- Offshore vs. onshore wind farms
- Introduction to Hydroelectric Power
- Types of hydroelectric systems

Afternoon Session

- Small Hydropower and Micro-Hydro Systems
- Wind and Hydro Energy Integration in Power Grids
- Case Study: Wind Farm or Hydroelectric Project Analysis

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

Day 3: Bioenergy and Geothermal Energy

Morning Session

- Bioenergy Overview
- Biomass sources and conversion technologies
- Biogas production and applications
- Geothermal Energy Basics
- Geothermal heat pumps
- Geothermal power generation

Afternoon Session

- Environmental and Social Impacts of Bioenergy
- Geothermal Exploration and Reservoir Engineering
- Field Trip or Virtual Tour: Geothermal Site Visit or Biomass Facility

Day 4: Energy Storage and Grid Integration

Morning Session

- Importance of Energy Storage in Renewable Energy Systems
- Battery Technologies for Grid-Scale and Off-Grid Applications
- Overview of Pumped Hydro Storage and Other Storage Methods

Afternoon Session

- Smart Grid Technologies and Demand Response
- Grid Integration Challenges and Solutions
- Case Studies on Successful Renewable Energy Grid Integration

Day 5: Policy, Economics, and Future Trends

Morning Session

- Renewable Energy Policies and Incentives
- Financing Renewable Energy Projects
- Techno-Economic Analysis of Renewable Energy Systems

Afternoon Session

- Emerging Trends in Renewable Energy Research and Development
- Role of Innovation and Entrepreneurship in Renewable Energy
- Panel Discussion: Future Outlook and Opportunities in Renewable Energy

REPORT ON 5 DAY ONLINE WORKSHOP ON TOPIC RENEWABLE ENERGY: PATHWAYS AND TECHNOLOGIES

The online workshop titled "Renewable Energy: Pathways and Technologies," organized by SNGCET from February 15th to 19th, 2021, provided a comprehensive exploration of fundamental principles and practices within renewable engineering. Its objective was to offer participants deep insights into diverse renewable energy sources, their applications, and the technologies propelling the shift towards sustainable energy systems. Due to the COVID outbreak the session was conducted online via Google Meet. The online workshop began promptly at 10 am, with Mr. Manuraj TV, the coordinator, delivering an insightful introduction on the subject. The departmental address followed, presented by Mr. Chandrajith E, the esteemed Head of the Mechanical Engineering Department at SNGCET.

The workshop commenced by overviewing renewable energy sources, with a focus on solar, wind, hydro, biomass, and geothermal energy. Discussions underscored the global energy landscape and the pivotal role of renewables in achieving carbon neutrality. Participants engaged in detailed explorations of solar photovoltaic (PV) and wind energy systems, covering design fundamentals, technological advancements, and strategies for project implementation. Case studies were presented highlighting successful solar and wind projects worldwide. Furthermore, the workshop addressed hydroelectricity, biomass energy production, and geothermal energy utilization. Experts shared valuable insights into extracting energy from water resources, organic waste, and heat from the Earth's crust.

The "Renewable Energy: Pathways and Technologies" workshop proved to be a valuable platform for exchanging knowledge and building capacity. Participants gained practical insights and resources to contribute towards expediting the global shift to renewable energy. Ongoing collaboration and learning are crucial for overcoming obstacles and realizing the complete potential of sustainable energy solutions. The workshop attracted participants, including faculty members keen on sustainable engineering. Interactive Q&A sessions following each presentation fostered dynamic discussions, allowing participants to seek clarification on sustainable design topics.

SYLLABUS

Day 1: Introduction to Hybrid Vehicles

Morning Session:

- Overview of Hybrid Vehicles Definition
- types of hybrid vehicles (series, parallel, series-parallel)
- Advantages and challenges of hybrid technology Hybrid Vehicle
- Architecture Components of a hybrid vehicle (electric motor, internal combustion engine, battery, transmission, etc.)
- How hybrid systems work: power flow, regenerative braking, start-stop systems

Afternoon Session:

- Hybrid Powertrains
- Comparison of hybrid powertrain architectures
- Role of the internal combustion engine and electric motor in hybrid propulsion Hybrid Vehicle Control Systems
- Control strategies for optimizing performance and efficiency Introduction to regenerative braking and energy management systems.

Day 2:Hybrid Vehicle Technologies

Morning Session:

- Battery Technologies for Hybrid Vehicles
- Types of batteries used in hybrid vehicles (NiMH, lithium-ion, etc.)
- Battery management systems and thermal management
- Electric Motors and Generators Types of electric motors used in hybrid vehicles (AC induction, permanent magnet, etc.)
- Role of generators in hybrid systems.

Afternoon Session:

- Transmission Systems
- Types of transmissions used in hybrid vehicles (CVT, dual-clutch, etc.)
- Power-split and planetary gear systems
- Energy Storage and Management Charging infrastructure for hybrid vehicles
- Energy storage considerations and optimization techniques

Leene

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR *Payyanur*

Day 3: Hybrid Vehicle Performance and Efficiency

Morning Session:

- Performance Characteristics of Hybrid Vehicles Acceleration
- top speed, and towing capacity
- Impact of hybrid technology on vehicle dynamics Fuel Economy and Emissions
- Factors affecting fuel efficiency in hybrid vehicles Emissions reduction strategies and regulatory compliance

Afternoon Session:

- Maintenance and Service of Hybrid Vehicles Routine maintenance procedures
- Safety considerations for working with high-voltage systems
- Hybrid Vehicle Diagnostics Common issues and troubleshooting techniques
- Introduction to diagnostic tools and software

Day4: Integration of Hybrid Technology

Morning Session:

- Hybrid Vehicle Design Considerations
- Vehicle packaging and integration of hybrid components
- Designing for optimal weight distribution and aerodynamics
- Vehicle Electrification Trends
- Market trends and future developments in hybrid and electric vehicles
- Impact of electrification on automotive industry

Afternoon Session:

- Case Studies and Practical Examples
- Review of successful hybrid vehicle designs
- Analysis of real-world performance and efficiency data

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

Day 5: Hands-On Workshop and Applications

Morning Session:

- Hybrid Vehicle Simulation Exercises
- Using simulation software to model hybrid vehicle performance
- Analyzing different driving scenarios and their impact on efficiency
- Hybrid Vehicle Component Demonstration
- Hands-on demonstration of hybrid vehicle components
- Safety protocols and procedures for working with hybrid systems

Afternoon Session:

- Hybrid Vehicle Test Drive
- Opportunity for participants to experience driving a hybrid vehicle
- Instructor-led discussion on driving techniques for maximizing efficiency

Q&A and Conclusion

Review of key concepts covered during the program

Opportunity for participants to ask questions and provide feedback

This syllabus provides a comprehensive overview of hybrid vehicle technology, covering theoretical concepts, practical applications, and hands-on experience over the course of five days.

Mastering Hybrid Vehicle Technology: A Comprehensive Online Program

Introduction

Hybrid vehicles represent a pivotal advancement in automotive technology, blending traditional internal combustion engines with electric propulsion systems. This innovative synergy addresses the growing concerns of environmental sustainability, fuel efficiency, and reduced emissions. In this introductory session, we will delve into the fundamental concepts of hybrid vehicles, exploring their definition, classification, and the underlying principles driving their adoption world wide. A hybrid vehicle is a transportation mode that integrates two or more distinct power sources to propel the vehicle forward. Typically, this includes an internal combustion engine (ICE) fueled by gasoline or diesel, alongside an electric motor powered by rechargeable batteries. This dynamic combination allows hybrid vehicles to optimize fuel efficiency, reduce emissions, and enhance overall performance compared to conventional vehicles solely reliant on ICE.

Classification of Hybrid Vehicles:

Hybrid vehicles come in various configurations, each offering unique benefits and operational characteristics.

The primary classifications include:

1. **Series Hybrid:** In this configuration, the electric motor is solely responsible for propelling the vehicle, with the ICE acting as a generator to recharge the battery pack.
- Parallel Hybrid:** Here, both the ICE and electric motor can independently power the vehicle, providing flexibility in utilizing either or both power sources depending on driving conditions.

**Dr. LEENA A. V.
PRINCIPAL**

**SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR**

2. Series-Parallel Hybrid: Combining elements of both series and parallel configurations, this hybrid type offers a balance between efficiency and performance by seamlessly switching between power modes as needed.

Advantages of Hybrid Vehicles:

The adoption of hybrid technology brings forth a myriad of advantages, including:

Fuel Efficiency: By harnessing the regenerative braking capabilities and electric propulsion, hybrid vehicles achieve significantly higher fuel efficiency ratings compared to traditional ICE vehicles.

Emissions Reduction: The integration of electric propulsion systems results in lower greenhouse gas emissions and pollutants, contributing to cleaner air and mitigating environmental impact.

Enhanced Performance: Hybrid vehicles often exhibit improved torque delivery, smoother acceleration, and reduced engine strain, translating to a more refined driving experience.

Regenerative Braking: Through regenerative braking, kinetic energy that would otherwise be lost during deceleration is captured and stored in the battery, further enhancing efficiency.

As we embark on this journey to explore the intricacies of hybrid vehicles, we aim to unravel the underlying technologies, design considerations, and real-world applications that continue to revolutionize the automotive landscape. Together, we will navigate through the complexities of hybrid propulsion, unveiling the sustainable future of transportation that lies ahead.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

**IoT | Workshop on Internet of Things using
Arduino, RaspberryPi & MQTT**

The Department of Electronics and Communication Engineering at Sree Narayana Guru College of Engineering and Technology conducted a IoT | Workshop on Internet of Things using Arduino, RaspberryPi & MQTT workshop for Plus Two students on 24.05.2021 to 28-05-2021. This workshop aimed to provide participants with a comprehensive introduction to robotics, emphasizing Arduino programming and the creation of line-following robots. The event was an overwhelming success, fostering enthusiasm among the students and providing them with invaluable skills and knowledge.

In the rapidly advancing technological landscape, the field of IOT plays a pivotal role. To instill a passion for electronics, programming, and robotics among Plus Two students, the Department of Electronics and Communication Engineering organized an immersive one-day workshop. This workshop encompassed a wide range of sessions, hands-on activities, and demonstrations to impart practical insights into the world of IOT.

The workshop began with a warm welcome by Prof. Raveendran K, HoD, ECE who introduced the participants to the objectives of the workshop, the importance of electronics and IOT, and the exciting prospects of pursuing careers in these fields.

The first part of the lesson was given by Raveendran K, introduced students to the world of Arduino programming. They gained knowledge of Arduino Board Layout & Architecture Reading from Sensors Programming fundamentals (C language), Arduino Programming & Interface of Sensors, Interfacing sensors with Arduino Programming, Arduino Reading from Sensors.

They improved their coding abilities, sharpened their problem-solving abilities, and discovered how to use Arduino to control various electronic components. The second day program was handled by Leena Narayanan which includes Integrating Ethernet Module &

Testing DHCP Connection, Creating Program for Localhost Web Server for controlling devices. Being Social on Twitter & update status on Twitter through Arduino, Make Electronics Gadget Talk to Internet, Integrating Ethernet Module.

The third day includes practical sessions based on Raspberry Pi. The further day students learned about Understanding MQTT, Difference between HTTP & MQTT, Understanding MQTT Broker, and Understanding Publish & Subscribe Methods.

The practical portion of the workshop was handled by lab staffs, in which students were charged with creating their own line-following robots, was one of its standout features. The participants meticulously built and programmed their robots under the direction of skilled teachers using kits that contained sensors, motors, and Arduino boards.

The session gave Plus Two pupils an invaluable educational opportunity and sparked their interest in robotics, electronics, and programming. The program was essential in igniting the interest in IOT fields among young engineers.

ONLINE WORKSHOP REPORT: FIVE DAYS WORKSHOP ON PYTHON

DATE: 01/03/2021 to 05/03/2021

VENUE: SEMINAR HALL

ORGANISED BY : TECHKRITI, CSE ASSOCIATION

The five days online workshop on python was organized with the aim of providing participants with comprehensive knowledge and hands-on experience in python. The online workshop covered a range of topics installation of python, basic concepts of python and BS- python shell, cs- list and functions used in python.

Day 1: Introduction of Python: The first day focused on basics of python. Students engaged in interactive discussion and activities to reinforce their understanding in online.

Day 2: Installation of python: The second day, the students got an hands on session for pycharm installation.

Day 3: Introduction to BS- python shell: The third day a lecture session was given to the students to get to know about the basics of python shell.

Day 4: The session about the CS-list : Fourth day, was dedicated to the students for practical demonstrations and exercise to ensure them how to develop a python program with cs list.

Day 5: Feedback and response: Last day of the online workshop is provided for an interactive session to get the feedback and responses from students through online.

The five day online workshop provided students with a understanding of the basics of python language. By combining theoretical concepts and practical session through online is worth for the students.

Report on Workshop on Water System Design

Date: 06/12/2021 - 10/12/2021

Venue: Online

The Department of Civil Engineering at SNGCET Payyanur organized a comprehensive 5-day online workshop on Water System Design. This workshop aimed to provide participants with insights into the design and management of water systems, focusing on various aspects such as supply, treatment, distribution, and wastewater management.

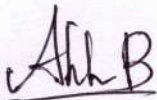

The workshop commenced with an overview of water systems, including their significance, components, and challenges. Participants gained insights into the importance of sustainable water management practices. Sessions focused on water supply sources, treatment techniques, and quality assessment. Participants learned about various treatment processes and their applications in ensuring safe and potable water supply. The workshop covered the design and analysis of water distribution systems. Participants explored hydraulic principles, network analysis, and optimization techniques for efficient water distribution. Sessions on wastewater management addressed collection, treatment, and disposal methods. Participants learned about wastewater treatment processes, regulatory requirements, and sustainable wastewater management practices.

Ms. Athira Balakrishnan and Ms. Sruthidas (AP CE) efficiently coordinated the workshop, ensuring seamless execution and engagement of participants. Their expertise and guidance were instrumental in delivering an enriching learning experience. Ms. Anagha K and Mr. Gokul Ambiloth, student coordinators from S8 CE, played a crucial role in organizing and facilitating various aspects of the workshop. Their dedication and teamwork contributed significantly to the success of the online event.

The 5-day online workshop on Water System Design provided participants with valuable insights

into the design, operation, and management of water systems. The Department of Civil Engineering extends gratitude to all faculty members, coordinators, and participants for their active participation and contribution to the success of the workshop, fostering learning and collaboration in the field of civil engineering.

5 Day Workshop on LATEST TRENDS IN AUTOMOBILE ENGINEERING, November 18-22, 2019

DAY 1		
Date	Time	
18-11-2019 (Monday)	9:00 AM-9:15 AM	Introduction by Coordinator Mr. Manuraj T V, Dept. of ME, SNGCET
	9:15 AM-9:25 AM	Departmental address by Mr. Chandrajith E HoD, Dept. of ME, SNGCET
	9:30 AM-12:30 PM	Expert talk by Mr. Aswin P Assistant Professor, Dept of ME, SNGCET Title: Introduction to Modern Automotive Technologies. (Overview of Automotive Industry, Introduction to current automotive market trends and challenges, Evolution of automotive engineering and its impact on modern vehicles.)
	01:30 PM-5:00 PM	Expert talk by Mr. Aswin P Assistant Professor, Dept of ME, SNGCET Title: Introduction to Modern Automotive Technologies (Discussion on fuel cell technologies and their potential impact, Vehicle Dynamics and Control Understanding vehicle stability control systems, Introduction to advanced driver-assistance systems (ADAS)).

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

DAY 2

19-11-2019 (Tuesday)	9:00 AM-12:30 PM	Expert talk by Mr. Lipin K Assistant Professor, Dept of ME, SNGCET Title: Innovations in Automotive Design and Materials (Lightweight Materials and Structures, Importance of lightweight materials in vehicle design, Case studies on the use of composites and advanced alloys.)
	01:30 PM-5:00 PM	Expert talk by Mr. Lipin K Assistant Professor, Dept of ME, SNGCET Title: Innovations in Automotive Design and Materials (Overview of design optimization for aerodynamic performance, Advanced Manufacturing Techniques, 3D printing and additive manufacturing in automotive prototyping, Robotics and automation in car assembly.)

DAY 3

20-11-2019 (Wednesday)	9:00 AM-12:30 PM	Expert talk by Mr. Chandrajith E HoD, Dept. of ME, SNGCET Title: Emerging Trends in Connected and Autonomous Vehicles (Internet of Things (IoT) in Automotive, Connected vehicle technologies and IoT applications, Cybersecurity challenges in connected vehicles.)
	01:30 PM-5:00 PM	Expert talk by Mr. Chandrajith E HoD, Dept. of ME, SNGCET Title: Emerging Trends in Connected and Autonomous Vehicles (Autonomous Driving Technologies, Levels of autonomy and current state of autonomous vehicle development, Sensors and perception systems in self-driving cars.)

5 DAY WORKSHOP ON LATEST TRENDS IN AUTOMOBILE ENGINEERING

SYLLABUS

Day 1: Introduction to Modern Automotive Technologies

Session 1:

- Overview of Automotive Industry
- Introduction to current automotive market trends and challenges.
- Evolution of automotive engineering and its impact on modern vehicles.

Session 2:

- Discussion on fuel cell technologies and their potential impact.
- Vehicle Dynamics and Control
- Understanding vehicle stability control systems.
- Introduction to advanced driver-assistance systems (ADAS).

Day 2: Innovations in Automotive Design and Materials

Session 3:

- Lightweight Materials and Structures
- Importance of lightweight materials in vehicle design.
- Case studies on the use of composites and advanced alloys.

Session 4:

- Overview of design optimization for aerodynamic performance.
- Advanced Manufacturing Techniques
- 3D printing and additive manufacturing in automotive prototyping.
- Robotics and automation in car assembly.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

Day 3: Emerging Trends in Connected and Autonomous Vehicles

Session 5:

- Internet of Things (IoT) in Automotive
- Connected vehicle technologies and IoT applications.
- Cybersecurity challenges in connected vehicles.

Session 6:

- Autonomous Driving Technologies
- Levels of autonomy and current state of autonomous vehicle development.
- Sensors and perception systems in self-driving cars.

Day 4: Sustainable Mobility and Future Challenges

Session 7:

- Sustainable Automotive Solutions
- Role of electric vehicles and sustainable mobility.
- Circular economy approaches in automotive manufacturing.

Session 8:

- Urban Mobility and Smart Cities
- Urban transportation challenges and solutions.
- Role of shared mobility and ride-sharing platforms.

Day 5: Industry Applications and Career Perspectives

Session 9:

- Advanced Powertrain Technologies
- Overview of electric vehicles (EVs) and hybrid vehicles.

Session 10:

- Aerodynamics and Vehicle Design
- Basics of aerodynamics and its role in vehicle efficiency.

WORKSHOP REPORT ON LATEST TRENDS IN AUTOMOBILE ENGINEERING

The workshop on the latest trends in automobile engineering, held by SNGCET from November 18th to 22nd, 2019, provided a comprehensive exploration of fundamental principles and practices in this dynamic field. The objective was to offer participants insights into various sources of automobile technology, their applications, and the transformative technologies driving this transition. The session commenced promptly at 9am with an introduction by Mr. Manuraj TV, the coordinator. Mr. Chandrajith E, the esteemed Head of the Mechanical Engineering Department at SNGCET, delivered the departmental address.

The workshop began with an overview of automobile engineering, emphasizing its continual evolution driven by technological advancements, changing consumer demands, and environmental concerns. This report highlights the latest trends shaping the automobile industry, including innovations in electric vehicles (EVs), autonomous driving, connectivity, materials, and sustainability.

The trends in automobile engineering are increasingly oriented towards electric, autonomous, connected, and sustainable mobility solutions. Technological advancements, combined with evolving consumer preferences and regulatory frameworks, are reshaping the automotive landscape towards a more efficient, safer, and environmentally friendly transportation future. Industry stakeholders must persist in innovation and collaboration to fully realize the potential of these trends and effectively address the challenges of tomorrow's mobility ecosystem.

KANNUR

DAY 2		
28-12-2019	09:00AM-12:30 PM	Fundamentals of control systems Mr. Ajith P. Instructor Dept. of EEE, GCEK
	01:30 PM-4:30 PM	Introduction to PID systems Mr. Ajith P. Instructor Dept. of EEE, GCEK
DAY 3		
29-12-2019	09:00 AM-12:30 PM	Introduction to PLCs Mr. Ajith P. Instructor Dept. of EEE, GCEK
	01:30 PM-4:00 PM	Hands-on exercises on PLC programming and simulation Mr. Ajith P. Instructor Dept. of EEE, GCEK

Dr. LEENA A. V.
PRINCIPAL
 SREE NARAYANA GURU COLLEGE OF
 ENGINEERING & TECHNOLOGY, PAYANUR
 KANNUR

DAY 4

30-12-2019	09:00 AM-12:30 AM	Introduction to HMI and SCADA systems Mr. Ajith P. Instructor Dept. of EEE, GCEK
	01:30PM-4:30PM	Hands-on session on HMI development and SCADA configuration Mr. Ajith P. Instructor Dept. of EEE, GCEK

DAY 5

31-12-2019	09:00 AM-12:30 PM	Introduction to Internet of Things (IoT) and Integration with Industrial Automation Mr. Ajith P. Instructor Dept. of EEE, GCEK
	01:30PM-3:45PM	Challenges of integrating industrial automation with IoT & case studies Mr. Ajith P. Instructor Dept. of EEE, GCEK
	3.45 PM -4.30 PM	Feedback session From students

**FIVE DAY WORKSHOP ON INDUSTRIAL AUTOMATION AND INTRODUCTION TO
IOT**

Introduction

Industrial automation and the Internet of Things (IoT) have revolutionized the way industries operate, enhancing efficiency, productivity, and safety. To provide participants with comprehensive insights into these transformative technologies, we are delighted to introduce a five-day workshop on Industrial Automation and Introduction to IoT.

Workshop Objectives:

Comprehensive Understanding: Participants will gain a thorough understanding of industrial automation principles, technologies, and their applications across various industries.

Hands-On Experience: Through practical sessions and demonstrations, participants will acquire hands-on experience with industrial automation systems, including Programmable Logic Controllers (PLCs), Human-Machine Interface (HMI), and Supervisory Control and Data Acquisition (SCADA) systems.

Introduction to IoT: The workshop will provide an introduction to the Internet of Things (IoT) and its integration with industrial automation, exploring IoT architecture, applications, and benefits.

Real-World Case Studies: Participants will examine real-world case studies and examples to understand the practical implementation of industrial automation and IoT in different industrial settings.

Future Trends and Opportunities: The workshop will conclude with discussions on emerging trends, challenges, and career opportunities in the fields of industrial automation and IoT.

**Dr. LEENA A. V.
PRINCIPAL**

**SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR**

Day 4: Human-Machine Interface (HMI) and SCADA Systems

Morning Session:

- Introduction to HMI and SCADA systems
- Role of HMI and SCADA in industrial automation
- Design principles for HMI development

Afternoon Session:

- SCADA architecture and components
- Hands-on session on HMI development and SCADA configuration

Day 5: Introduction to Internet of Things (IoT) and Integration with Industrial Automation

Morning Session:

- Definition and characteristics of IoT
- Applications of IoT in industrial settings
- IoT architecture and components

Afternoon Session:

- Benefits and challenges of integrating industrial automation with IoT
- Case studies and demonstrations showcasing IoT integration in industrial automation systems

**Report On Five Day Workshop On Industrial Automation And
Introduction To Iot**

The Department of Electrical and Electronics Engineering conducted Five-day workshop on industrial automation and introduction to IoT for students of Electrical and Electronics Engineering from 27/12/2019 to 31/12/2019. A Total of 17 students participated in the training session.

The event was inaugurated by Dr. V K Janardhanan, Principal, SNGCET. Welcome address was delivered by Prof. Raveendran K.(HoD, EEE). Dr. Leena A.V. (Dean Academics) and Mr. Abhilash Krishnan T.K. (AP, EEE) delivered felicitation speech and, student coordinator Mr. Shinith K.V. delivered vote of thanks. The inaugural session concluded at 10:00 a.m., after which the training session started. The session was conducted by Mr. Ajith P. (Instructor, Department of Electrical and Electronics Engineering, GCEK, Kannur)

The workshop aimed to provide students with a comprehensive understanding of industrial automation principles, technologies, and their integration with the Internet of Things (IoT). The workshop included theoretical sessions, hands-on activities, and discussions on real-world applications.

On the first day, students were introduced to the concept and significance of industrial automation. They learned about the evolution of industrial automation, its components, advantages, and challenges. The second day focused on the fundamentals of control systems. Students learned about different types of control systems, sensors, actuators, and feedback mechanisms. The concept of PID control was introduced, followed by practical exercises to reinforce the theoretical knowledge. Day three was dedicated to Programmable Logic Controllers (PLCs). Participants received an overview of PLCs, their architecture, programming languages, and communication protocols. The fourth day covered Human-Machine Interface (HMI) and Supervisory Control and Data Acquisition (SCADA) systems. Participants learned about the role of HMI and SCADA in industrial automation, design principles, and configuration methods. The final day focused on IoT and its integration with industrial automation. Students learned about IoT architecture, applications, and the benefits of integration with industrial systems.

PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

The five-day workshop provided students with a comprehensive understanding of industrial automation and IoT. Through a combination of theoretical sessions and hands-on activities, students gained practical knowledge and skills that can be applied in their respective industries. The workshop received positive feedback from students, who expressed appreciation for the interactive sessions and valuable insights provided by the instructors.

FEEDBACK FORM

Thank you for participating in our 5-day Workshop On Industrial Automation And Introduction To Iot. Your feedback is valuable to us as we strive to continuously improve our training programs. Please take a few moments to share your thoughts and suggestions regarding the training you received.

Participant Information:

Training Session Evaluation:

1. Overall Satisfaction:

- Very Satisfied
- ☒ Satisfied
- Neutral
- Dissatisfied
- Very Dissatisfied

2. Relevance of Training Content:

- Highly Relevant
- ☒ Relevant
- Somewhat Relevant
- Not Relevant

3. Clarity of Instruction:

- ☒ Very Clear
- Clear
- Somewhat Clear
- Unclear

4. Quality of Training Materials:

- Excellent
- ☒ Good
- Fair
- Poor

5. Effectiveness of Hands-on Exercises:

- Very Effective

WORKSHOP ON DIGITAL IMAGE PROCESSING USING PYTHON

The Department of Electronics and Communication Engineering at Sree Narayana Guru College of Engineering and Technology conducted a workshop on digital image processing using python from 04.11.2019 to 08.11.2019. The aim of the workshop is to introduce participants to the fundamentals of digital image processing.

The workshop began with a warm welcome by Prof. Raveendran K, HoD, ECE who introduced the participants to the objectives of the workshop. This Five day workshop's objectives were to familiarize participants with the Python programming language and give them the foundational knowledge they would need to use Python in a variety of applications. Subitha M. B. planned the event, while Er. Sreelakshmi C., an expert Python trainer, led the training. 40 eager participants from a variety of backgrounds, including complete novices and those with some prior coding experience, attended the class.

(PROMOTED BY SREE BHAKTHI SAMVARDHINI YOGAM, KANNUR)
CHALAKODE P.O., PAYYANUR, KANNUR-670307, KERALA

The topics include introduction, image preprocessing, image transformation, image segmentation, etc.

The practical exercises were given to put their new knowledge into practice during the program. Participants gave the workshop overwhelmingly excellent reviews. Participants praised the thorough treatment of image processing concepts and the practical learning style.

Online Workshop on Trending Perspective of AI in Robotics

SYLLABUS

SL No	Topic
1	Introduction to AI in Robotics <ul style="list-style-type: none">• Overview of AI and Robotics• Historical perspective and evolution• Basic concepts: Machine Learning, Deep Learning, Reinforcement Learning• Ethical considerations and societal impacts
2	AI Algorithms for Robotics <ul style="list-style-type: none">• Perception algorithms: Computer Vision, LiDAR, Sensor Fusion• Localization and Mapping (SLAM)• Path planning and Navigation• Control algorithms: PID, MPC, Reinforcement Learning for control
3	Cutting-edge Research and Future Directions <ul style="list-style-type: none">• State-of-the-art research in AI and Robotics• Emerging trends: Swarm robotics, Soft robotics, Bio-inspired robotics• Challenges and open problems• Opportunities for innovation and entrepreneurship
4	Advanced AI Techniques in Robotics <ul style="list-style-type: none">• Deep Reinforcement Learning for robotics• Transfer learning and domain adaptation• Human-robot interaction• Explainable AI in robotics
5	Applications of AI in Robotics <ul style="list-style-type: none">• Industrial robotics: Automation, Manufacturing• Service robotics: Healthcare, Hospitality, Retail• Autonomous vehicles: Cars, Drones, Underwater vehicles• Agricultural robotics: Precision farming, Harvesting robots

Summary Report of the Online workshop on Trending Perspective of AI in Robotics

Date: 7th April 2020 to 11th April 2020

Venue: Google Meet

The Department of Computer Science and Engineering (CSE) at Sree Narayana Guru College of Engineering and Technology (SNGCET) organized a Online workshop focusing on the "Trending Perspective of AI in Robotics" from 07/04/2020 to 11/04/2020. The Online workshop aimed to explore the intersection of artificial intelligence (AI) and robotics, highlighting the latest developments, challenges, and future prospects in this dynamic field. Mr. Sunder V and Mrs. Gripsy Paul Mannickathan ,Assistant professors, ASIET, Kaladi commenced the Online workshop with an insightful introduction to the integration of AI in robotics and the event is coordinated by Sreeraji Narayanan, Assistant Professor, SNGCET.

The speakers delved into various real-world applications where AI is transforming robotics, including autonomous vehicles, healthcare robotics, industrial automation, and smart manufacturing. They discussed recent trends such as collaborative robots (cobots), swarm robotics, and reinforcement learning algorithms enhancing robot autonomy and decision-making capabilities. provided valuable insights into the transformative potential of AI in reshaping the field of robotics. By elucidating current trends, challenges, and opportunities, the Online workshop served as a platform for knowledge sharing and collaborative discourse, fostering a deeper understanding of the intersection between AI and robotics and inspiring future innovations in this exciting domain.

The Online workshop concluded with an engaging Q&A session, where participants had the opportunity to interact with the speakers, seeking clarification on various topics discussed during the session. The exchange of ideas and perspectives further enriched the learning experience and fostered a sense of community among participants.

WORKSHOP ON

FUNDAMENTALS OF WATER DISTRIBUTION SYSTEM & DESIGN

(11/05/2020 to 16/05/2020)

SCHEDULE

Day 1: Introduction to Hydronic Systems

FN – 9.00am to 12.00pm

Session 1: Overview of Hydronic Systems

Session 2: Components of Closed Hydronic Systems

AN – 1.00pm to 4.00pm

Session 3: Components of Open Hydronic Systems

Session 4: Q&A and Discussion

Day 2: Basics of Piping System Design

FN – 9.00am to 12.00pm

Session 1: Introduction to Piping System Design

Session 2: Basic Concepts and Principles

Session 3: Types of Pipes Used in Hydronic Systems

AN – 1.00pm to 4.00pm

Session 4: Pipe Sizing and Selection

Session 5: Q&A and Discussion

Day 3: Centrifugal Pumps Operation and Selection

FN – 9.00am to 12.00pm

Session 1: Principles of Centrifugal Pumps Operation

Session 2: Pump Characteristics and Performance Curves

AN – 1.00pm to 4.00pm

Session 3: Matching Pumps to Systems

Session 4: Pump Selection Criteria and Considerations

Session 5: Q&A and Discussion

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR

Day 4: Terminal Unit Control and Optimization

FN – 9.00am to 12.00pm

Session 1: Introduction to Terminal Unit Control

Session 2: Understanding Control Variables

AN – 1.00pm to 4.00pm

Session 3: Control Strategies and Optimization Techniques

Session 4: Case Studies and Examples

Session 5: Q&A and Discussion

Day 5: Water Chiller Operation and Efficiency

FN – 9.00am to 12.00pm

Session 1: Basics of Water Chillers and Chiller Plants

Session 2: Chiller Efficiency and Energy Optimization

AN – 1.00pm to 4.00pm

Session 3: Maintenance Strategies for Chiller Systems

Session 4: Case Studies on Chiller Optimization

Session 5: Q&A and Discussion

Day 6: Practical Applications and Review

FN – 9.00am to 12.00pm

Session 1: Practical Demonstration: Designing a Hydronic System

Session 2: Group Presentations: Case Study Analysis

AN – 1.00pm to 4.00pm

Session 3: Review of Key Concepts and Learning Outcomes

Session 4: Participant Feedback and Suggestions

Session 5: Closing Ceremony

Session Handlers :

1. **Dr. Leena A V – Associate Professor SNGCET**
2. **Dr. Susan Abraham - Associate Professor SNGCET**
3. **Mrs. Saritha Sasindran – Assistant Professor SNGCET**

WORKSHOP ON

FUNDAMENTALS OF WATER DISTRIBUTION SYSTEM & DESIGN

(11/05/2020 to 16/05/2020)

SYLLABUS

Water System Design Components

Introductory concepts, basic system components, heat transfer in hydronic systems and load systems.

Piping System Design

Basic considerations, design philosophy, sizing piping, and flow rate measurement.

Pipe Materials and Fittings

Pipe materials, corrosion, valves and fittings, backflow-prevention devices, and pipe selection.

Centrifugal Pumps

Types of pumps, pump selection and system design considerations.

Terminal Unit Performance and Control

Types of terminals, performance and control, system control characteristics, and system control configurations.

Expansion Tanks and Air Elimination

Open and closed water systems, hydronic accessories, and sizing expansion tanks.

Piping System Development

Piping system design, direct return analysis, primary-secondary analysis, types of pumps and valves, primary-secondary application study, antifreeze solutions for low temperature applications, and pumping design factors.

Matching Pumps to Systems

Matching the pump to the system, parallel pumping, series pumping, standby pumps, trimming pump impellers, two-speed pumping, variable speed pumping and source distribution pumping.

Water Chillers and Load Control

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF

Report on Workshop on Fundamentals of Water Distribution System & Design

Date: 11/05/2020 to 16/05/2020

Venue: Online mode / Google Meet

The Department of Civil Engineering at Sree Narayana Guru College of Engineering & Technology organized a comprehensive six-day online workshop on the "Fundamentals of Water Distribution System & Design." The workshop, conducted from May 11, 2020, to May 16, 2020, aimed to equip participants with essential knowledge and skills related to water distribution systems and their design principles. The workshop was efficiently coordinated by student coordinators Arjun M V and Krishna Veni K, along with faculty coordinators Mrs. Shilpa Valsakumar and Mr. Abhishek C V. Their dedication and guidance ensured the smooth execution of the workshop. The workshop covered a comprehensive syllabus focusing on essential aspects of water distribution systems and design principles. Participants delved into the following topics:

The components of closed and open hydronic systems.

Basic concepts of piping system design.

Different types of pipes used in hydronic systems.

Operation principles of centrifugal pumps.

Matching pumps to systems effectively.

Variables involved in terminal unit control.

Optimization techniques for water chiller operation.

Throughout the six days, participants engaged in interactive sessions, lectures, and practical demonstrations facilitated by experienced instructors. The workshop adopted a blend of theoretical knowledge and practical applications, ensuring a holistic learning experience.

ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

The "Fundamentals of Water Distribution System & Design" workshop provided an invaluable platform for participants to deepen their understanding of water distribution systems and design principles. Through collaborative efforts and dedicated coordination, the workshop successfully equipped participants with essential skills essential for their academic and professional endeavors. The Department of Civil Engineering at Sree Narayana Guru College of Engineering & Technology continues to uphold its commitment to fostering excellence in engineering education through such initiatives

5Day Workshop on MASTERCAM: CNC PROGRAMMING, February 18-22, 2019

DAY 1		
Date	Time	
18-02-2019 (Monday)	9:00 AM-9:15 AM	Introduction by Coordinator Mr. Manuraj T V, Dept. of ME, SNGCET
	9:15 AM-9:25 AM	Departmental address by Mr. Chandrajith E HoD, Dept. of ME, SNGCET
	9:30 AM-12:30 PM	Expert talk by Dr. Abdul Nazar K P, Associate Professor Dept of Mechanical Engineering, GEC Kannur Title: 2D geometric commands and the applications.
	01:30 PM-5:00 PM	Expert talk by Dr. Abdul Nazar K P, Associate Professor Dept of Mechanical Engineering, GEC Kannur Title: 2D geometric commands and the applications.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

DAY 2

19-02-2019 (Tuesday)	9:00 AM-12:30 PM	Expert talk by Dr. Solamon Joseph, Lecturer ME, GPC Periy, Kasargod. Title: Translation commands for 2D geometry editing.
	01:30 PM-5:00 PM	Expert talk by Dr. Solamon Joseph, Lecturer ME, GPC Periy, Kasargod. Title: Featuring 2D geometry for 2D tool path, Contouring tool path generation.

DAY 3

20-02-2019 (Wednesday)	9:00 AM-12:30 PM	Expert talk by Dr. Abdul Nazar K P, Associate Professor Dept of Mechanical Engineering, GEC Kannur Title: Simulation of generated tool path, Generation of NC part program with the suitable post processor.
	01:30 PM-5:00 PM	Expert talk by Dr. Abdul Nazar K P, Associate Professor Dept of Mechanical Engineering, GEC Kannur Title: 3D modelling and solid editing, Translation of 3D models.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR

5 DAY WORKSHOP ON MASTER CAM

MasterCam Training Syllabus

Day 1

I. MasterCam Configuration/Settings:

- Operating PC, Hardware Accelerations Settings
 - Typically Second Mark from Left on Slider Bar
 - *To Access Hardware Settings:* Go to Desktop > Right Click > Select Properties > Select Settings > Select Advanced > Select Troubleshoot > Adjust Hardware Acceleration Slider bar.
- HELP Option
 - Use feature for learning assistance.
 - Also, use quick learning mode (Hover Mouse cursor over icons on screen to see popup that tells function of particular icon or button)
 - Explain Update Feature which checks for software updates
 - Explain Zip2 go Feature which is used for technical support reasons
- *MasterCam Settings/Configuration* (SETTINGS > CONFIGURATION or ALT + F8)
 - Most commonly altered settings per user
 - Setup Colors
 - Setup Default Machines
 - Start/Exit (Setting to personal Settings)
 - How to Save/Exit Custom Config file.
 - How to Load exist custom file and set to default

II. Screen Layout:

- *Toolbar display* (Type MRU in HELP menu for greater details)
 - *Select:* SETTINGS > Toolbar States
 - Show how Toolbars can be moved about screen to desired location
- *Status Bar* (Located Bottom of Screen)
 - 3D/2D
 - GVIEW (Graphics View)
 - Explain Various Views
 - **Only Router Pro Students:** Explain "View By Entity"
 - Used Two lines to create New GView for Tool Control or

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PATTANUR
KANNUR

- Used One line to create New GView for Tool Control or Designing purposes
 - Be sure to select “Normal” line at base to project arrow away from part
 - PLANES
 - Use for construction of geom. **DO NOT USE** for creating new tool Control Lines or views
 - Z Depth
 - Colors
 - Changing Colors
 - Levels
 - Changing Levels
 - Attributes
 - Changing Attributes
 - Explain how Attribute dialogue can be used to change Color, Line type, Layer etc....
- *Right Click Menu*
 - Zoom./Unzoom
 - Explain common optional features: F1 (Zoom Window), F2 (Zoom previous)
- *Operations Manager*
 - Briefly Describe that it is to be used for managing toolpath information.

III. Intro. to Creating CAD Geometry (Sketch geom. on screen on demand)

- Using CREATE Option (Explain that Yellow input fields allow input with math functions)
 - Lines (All)
 - Circles/Arcs (All)
 - Tangent Entities
 - Points (All)
 - Rectangles
 - Rectangular shapes
 - Polygons
 - Ellipses
 - Bounding Box (2D)
 - Letters
 - Splines
 - Manual
 - Automatic
 - Curves (*Only Router Pro Students*)
 - > Used to apply wireframe geom. to existing surfaces
 - Blended (*Only Router Pro Students*)
 - > Typically used to attach arcs in 3D space
 - Use Magnitude to Adjust

Dr. LEENA A. V.
PRINCIPAL
 SREE NARAYANA GURU COLLEGE OF
 ENGINEERING & TECHNOLOGY, PAYANUR
 KANNUR

- Fillets
- Chamfers
- Primitives (*Only Router Pro Students*)
- Using ANALYZE option
 - Explain how this feature can also be used as Editing Feature
- Using EDIT > Trim/Break option
 - Trimming Entities
 - Breaking Entities
 - Extending Entities
- Using XFORM option
 - Translate
 - Rotate
 - Mirror
 - Scale
 - Uniform/XYZ
 - Offset Contour
 - Offset
 - Transform Rectangular Array
 - Drag
 - Stretch
 - Nesting: Rectangular/Tru-Shape
 - Explain Groups/Resulting Colors
 - Explain how to Clear Colors (Right Click > Clear Colors)

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

Day 2

IV. Creating 2D MasterCam - Toolpath file

- *Distribute and Load post files*
 - Post files
 - .PST (C:\McamX2\router\posts)
 - .TXT (C:\McamX2\router\posts)
 - Machine Files
 - .Control (C:\McamX2\cnc_machines)
 - .RMD (C:\McamX2\cnc_machines)
- Setup Tools in Tool Manager
 - Create Tool File per customer
 - *Select: TOOLPATHS > Tool Manager*
- Machine Type
 - *Select: MACHINE TYPE option*
 - Explain this can be setup through Configuration Defaults so that when file is opened, machine group will already exist in Operations manager.
 - Once Machine Type is Loaded - Explain PROPERTIES of Machine Group
 - *Go to Operations Manager Select: Machine Group > Select: PROPERTIES*
 - Explain Tool Setup
 - “Assign Tool Numbers Sequentially”
 - Be sure this is **NOT Checked**
 - Explain Stock Setup
 - Displays stock based on user input
 - Allows visual for Verify Feature
- Applying Tool Paths to 2D Parts
 - Open and explain “Basic-2D_1.MCX” drwg file
 - Use “MACHINE_CONFIG.MCX” to explain Merge File option and to show customer how they can use a machine config. Drawing to help them understand part position relative to machine work envelope and use this file as a template. If there are some common toolpaths which will be used, those toolpaths can be added to the machine config file and this file used as a Template type file (will be able to load file and simply reselect Toolpath geom. and Regenerate).
 - Explain Back Plotting feature
 - Note that backplot movements can be saved as actual geom.
 - Show Verify feature

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

- Explain Ability to Edit Toolpath Parameters & Selected Operation Geom.
 - Show ability to Turn visibility of Tool Paths ON/OFF
 - Explain Regeneration of “Dirty” Operations after they’ve been edited
 - Explain Ability to Post CNC code
 - Drilling
 - Automatic
 - Entities
 - Window Points
 - Mask on Arc
 - Sorting Methods
 - Pocketing (Standard)
 - Contour (2D)
 - Ramp Contour Tool path
 - Circle Tool paths/Circle Mill
 - Hand out Hard copy of “Basic-2D_1.MCX” drwg file and let student/s work through project, helping them as needed.
 - Use Additional “2D” sample dwgs. if needed for time filler and additional explanation of toolpath options.
- Working with Toolpath geom. in Operations Manager
- Copying Toolpaths
 - Allows user to copy existing toolpath and alter settings to fit a similar geom.
 - *Select: Toolpath to Copy > Right Click > Select: Copy > Reposition Red Arrow to desired location > Select: Red Arrow > Right Click > Select: Paste*
 - Importing
 - Allows user to Import Toolpath Parameters from another MCX file
 - *Select: Toolpath to Copy > Right Click > Select: Copy > Reposition Red Arrow to desired location > Select: Red Arrow > Right Click > Select: Paste*
 - Creating a New Toolpath Group
 - Allows user to manage Toolpaths in greater detail (ie: create a group for fixture machining, group for part trim, etc...)
 - *Select: Machine Group in which you want to create a new Toolpath Group > Right Click > Select: Groups > Select: New Toolpath Group*
 - Transforming toolpath
 - Allows user to Translate and Copy existing toolpath throughout material sheet

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

Day 3

V. Creating 3D MasterCam - Toolpath file

- Intro to Three-dimensional Drawing
 - Explain 1" Selection grid for ease of following 3D design
 - *Select: SCREEN > Select: Screen Grid Settings*
 - Set Grid to 1" size with .05 grid
 - Return to Graphics screen, change PLANES to show reaction with visible Grid
 - Use CREATE option to draw sample shapes in different PLANES
 - Draw 3D wireframe part
 - Open/Explain "3D_Wireframe-1.MCX"
 - > Create part by first drawing 2D profile, then sweeping geom. into 3D part using the XFORM > Translate > JOIN feature
 - **Note:** For Router students planning to use the 4th Axis/Aggregate
 - > Use various PLANES (ie: Front, Side, etc...) to create tool planes for creating Horizontal boring, Mortising, tool paths
 - Hand out Hard copy of "3D_Wireframe-1.MCX" drwg file and let student/s work through project, helping them as needed.
 - **Note:** At this time For Router Pro Students (Skip to next topic: Surfaces for router Students):
 - Continue Applying toolpaths to "3D_Wireframe-1.MCX"
 - > Create and Save a User-defined Gview/Construction Plane/Tool plane (Normal GVIEW)
 - Display this option on angled face of BLOCK
 - > Toolpath part
 - Pocketing from Top
 - Pocketing On Angle (Using newly defined tool plane)
 - Contour Slot (Using newly defined tool plane)
 - Drill Hor. Hole (Using Right Side tool plane)
- Intro to Surfaces
 - Open/Explain "3D_Surfaces-Router.mcx"
 - Create & demonstrate various primary surface methods
 - Ruled/Lofted Surfaces
 - > Differences between Ruled/Lofted
 - Revolved Surfaces
 - > Draw profile off to side and revolve geom. around a line designated as center axis to show this option
 - Swept Surfaces
 - Net Surface

Dr. LEENA A. V.
PRINCIPAL

**SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR**

- > Draw closed boundary shape to show this option
 - Draft Surface
 - > Extend one of the wire frame entities of “3D_Surfaces-Router.mcx” to show this option
 - Extruded Surface
 - > Draw profile off to side and extrude to show this option
 - Flat Boundary Surface
 - > Draw closed boundary shape to show this option
- Secondary Surface Operations
 - Offset surfaces
 - Fence surfaces
 - Fillet Surfaces
 - Trimming Surfaces
 - Extending Surfaces
- Projecting curves onto surfaces
 - Draw entity or shape above surface of part and project to surface of existing part
- Importance of Surface Normals & how they affect surface fillets, offset surfaces, and head orientation (5 axis machining)
- Projection normal lines from surfaces
 - Create a point on angled surface
 - > CREATE > Point > Dynamic
 - Use XFORM > XFORM Project to create line
- Vertical (TOP PLANE) Toolpaths
 - Surface Rough
 - > Discuss Drive surfaces
 - > Check surfaces
 - > Tool Containment boundaries
 - > Depth limits
 - Surface Finish Tool paths
 - > Finish parallel
 - > Finish scallop
 - > Finish leftover
 - > Finish Pencil
- Hand out Hard copy of “3D_Surfaces-Router.mcx” drwg file and let student/s work through project, helping them as needed.
- **Note:** At this time For Router Pro Students Move onto “3D_Surfaces-Router_Pro.mcx” file
- Continue 3D Design/Entry to 5 axis machining
 - Open Explain “3D_Surfaces-Router_Pro.mcx” file
 - Create wireframe

Dr. LEENA A. V.
PRINCIPAL
 SREE NARAYANA GURU COLLEGE OF
 ENGINEERING & TECHNOLOGY, PAYYANUR
 KANNUR

Day 4

- Finish any remaining surface machining 3D designing functions cut short on Day 3.
- Multi Axis Surface Toolpaths
 - Use “3D_Surfaces-Router.mcx” &/or “3D_Surfaces-Router_Pro.mcx” drwg file
 - Illustrate Multiaxis Surfacing Toolpaths
 - 5 Axis Multi Surface
 - Note that Multi Surface performs most everything Flowline does
 - Show How Flowline can be changed in ToolPath Parameters of Multi Surface
 - 5 Axis Flowline
- Multi-Axis Trim Paths
 - Use “3D_Surfaces-Router_Pro.mcx” file to Illustrate
 - 5 Axis Curve
 - Variety of tool axis control methods, e.g., lines surface, etc.
 - Variety of entry/exit strategies
 - Step increment vs. chord height wall following methods
 - 5 Axis Swarf
 - Variety of tool axis control methods, e.g., lines surface, etc.
 - Variety of entry/exit strategies
 - Step increment vs. chord height wall following methods
 - 5 Axis Drill
 - Create points on surface of part
 - CREATE > Point > Dynamic
 - Discuss Misc. Values and there affects on Posted Code
 - Hand out and explain “PostDocXMR1&2-5AX-R1.pdf” file
 - *MISC values Located in: Toolpath Parameters*

WORKSHOP REPORT ON MASTERCAM: CNC PROGRAMMING

The "Workshop on MASTERCAM: CNC Programming" was conducted by the Department of Mechanical Engineering (ME) from February 18th to February 22nd, 2019, starting at 10 AM in the seminar hall of the Mechanical department. The workshop was conducted for pre-final year mechanical students. The primary objective of the workshop was to introduce students to the fundamentals of CNC programming. Apart from students, the workshop also saw participation from the staff of SNGCET. The event commenced with a welcoming speech by Mr. Manuraj T V, Assistant Professor of ME and the event coordinator, who expressed gratitude to all attendees and faculty members for their enthusiastic support.

The workshop commenced with a warm welcome from the esteemed Head of the Department, Mr. Chandrajith E. Expert insights were shared by Dr. Abdul Nazar K P, Dr. Solamon Joseph, and Mr. Jacob Thomas. Attendees were provided with hands-on experience in tasks such as creating toolpaths, generating G-code, and simulating machining operations within the Mastercam software environment. Interactive sessions and live demonstrations facilitated the acquisition of skills in utilizing Mastercam's advanced features for intricate part design and machining optimization. Moreover, the workshop covered diverse machining strategies and techniques aimed at bolstering productivity and attaining precision in CNC programming. Participants also familiarized themselves with best practices concerning tool selection, workpiece setup, and rectifying common programming errors.

Dr. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR

The recent workshop on Mastercam for CNC Programming provided participants with valuable insights and practical skills in computer numerical control (CNC) programming. Spanning over several sessions, the workshop delved into the fundamentals of Mastercam software, emphasizing its applications in CNC machining processes.

Overall, the workshop proved instrumental in equipping attendees with practical skills and knowledge essential for proficient CNC programming using Mastercam software. Attendees departed the session with renewed inspiration and a steadfast determination to further refine their concepts, with the aim of making a positive impact on the world through their innovative endeavors. The session, featuring informative presentations and insightful discussions, undoubtedly enriched the academic atmosphere at SNGCET. Through a blend of theoretical concepts and practical exercises, participants left the workshop with a deeper understanding of CNC programming principles and enhanced capabilities in utilizing Mastercam for optimizing machining processes.

REPORT ON CRAFTING WITH CAD: A 5-DAY WORKSHOP SERIES

The Department of Electrical and Electronics Engineering conducted Fivedaysworkshop on “**Crafting with CAD: A 5-Day Workshop Series**” for students of Electrical and Electronics Engineering from 26/12/2018 to 30/12/2018. A Total of 11 students participated in the training session. The students gained knowledge on recent trends in hybrid vehicle and the increasing demand in this technology

The event was inaugurated by Prof. Raveendran K, (HoD, EEE). Welcome addresse was delivered by Mr. Abhilash Krishnan (AP, EEE). Dr. Leena A V (Dean Academics delivered felicitation speech and Mr. Vishnu Unnikrishnan, student coordinator delivered vote of thanks. The inaugural session concluded at 9.30 a.m., after which the training session started.

The objective of the 5-days **Crafting with CAD: A 5-Day Workshop Series** The objective of the Crafting with CAD workshop is to equip participants with the knowledge, skills, and practical experience necessary to proficiently utilize Computer-Aided Design (CAD) software in their respective fields. Through hands-on training, interactive sessions, and practical exercises, the workshop aims to achieve the following objectives: Understanding CAD Fundamentals , Developing Proficiency in 2D and 3D Modelling ,Exploring Industry Applications ,Enhancing Design Visualization and Communication ,Optimizing Design and Production Processes Encouraging Creative Problem-Solving. Developing Proficiency in 2D and 3D Modeling Exploring Industry Applications Enhancing Design Visualization and Communication: Optimizing Design and Production Processes Encouraging Creative Problem-Solving

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

**A Brief Report Of ~~Five~~ Days Internship Program On
EMBEDDED C AND C++ WITH HANDS-ON-TRAINING
on 25-07-2018 to 29 -07- 2018**

The Department Of Electronics and Communication has organized a three days Internship Program on **EMBEDDED C AND C++** in technical collaboration with Armino Embedded & Automation Solutions LLP, Calicut on 25th July to 29th July 2018 at SNGCET, Payyanur.

Mr.N.P Sooraj and Mr.Jithesh K of Armino Embedded & Automation Solutions LLP, Calicut were the resource persons for the program. They have a wide industrial experience in the field of Embedded Systems and solutions. Armino is an Indian Domestic Electronic and Automation Company headquartered at Calicut, Kerala. Armino mainly focuses on automation solutions, embedded and Green energy services.

Main objective of this technical and educational program was to introduce the knowledge of Embedded C and C++ Systems for S7, S5 and S3 students, which will be useful for their academic project development and curriculum.

The Inaugural function of the Internship Program started with welcome address by Prof. Raveendran K, H.O.D, Electronics & Communication Engineering Department. The Principal, Dr. V.K. Janardanan was the chief guest for the function. He inaugurated the workshop. Lt.Col C Preveen felicitated the workshop and Ms Leena Narayanan, Assistant Professor delivered the vote of thanks.

DR. LEENA A. V.
PRINCIPAL
SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYYANUR
KANNUR

After the inaugural session, technical session was started by Mr. N.P Sooraj on the topic "Overview of Embedded Systems". He mentioned briefly about the architecture and application of embedded systems. In the afternoon session simple programs were discussed and different sensors were interfaced with Microcontroller.

On the second day Wireless Communication basics were covered and Machine to Machine Communication was introduced. On the third day concepts of C++ were introduced and also simple C++ programs were discussed.

The key focus of the Internship Program was hands-on training on Arduino board and different sensors. In the interactive lab session, Mr. Sooraj explained the basics of Embedded C and demonstrated the above software with few design examples.

33 students and 6 faculty members actively participated and had an excellent learning experience with hands-on training in the internship program.

The Internship Program ended with a feedback from Ms. Aswathi Sreekanth of S7 ECE. Students suggested that workshops of this kind would be very useful for them to learn and develop the academic projects in more effective manner.

The workshop was a great success and marked a milestone to the entire Department of Electronics & Communication Engineering.

Summary Report of the Workshop on Web Development Technologies

Date: 18th February 2019 to 22th February 2019

Venue: Meeting Hall, Department of Computer Science and Engineering (CSE), Sree Narayana Guru College of Engineering and Technology (SNGCET)

The Department of Computer Science and Engineering (CSE) at Sree Narayana Guru College of Engineering and Technology (SNGCET) organized a workshop on "Web Development Technologies" from February 18th to February 22nd, 2019. The objective of this workshop was to provide students with valuable insights into various web development technologies.

The event was inaugurated by Dr. Janardhanan P V, the Principal of SNGCET, and Ms. Amitha I C, the Head of Department (HoD) of SNGCET. Ms. Shreesha Govind, Assistant Professor at SNGCET, served as the resource person for the workshop.

During the workshop, participants were introduced to fundamental concepts of web development, including HTML, CSS, JavaScript, and various frameworks and libraries. Hands-on sessions were conducted to provide practical experience in building web applications and websites.

Overall, the workshop was well-received by students, who expressed appreciation for the comprehensive coverage of topics and the opportunity to learn from experienced team members. The event concluded successfully, with students gaining valuable knowledge and skills in web development technologies.

DEPARTMENT OF CIVIL ENGINEERING

WORKSHOP ON ADVANCED DESIGN TECHNIQUES

SCHEDULE

DAY	TIME	TOPICS
Day 1 (15-04-2019)	9.00 am to 12 pm	Inaugural session & Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic: Environmental Impact Assessment
	1.00 pm to 4.00 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic: Planning Principles Population and Demand Rates Demand Calculations
Day 2 (16-04-2019)	9.00 am to 12 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic: Water Treatment Plants, Pumping Stations
	1.00 pm to 4.00 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic: System Component - Transmission Mains And Distribution Systems
Day 3	9.00 am to 12 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic : Design Hydraulic Modelling and Analysis - Network Design Economic

(17-04-2019)		Calculations
	1.00 pm to 4.00 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic : Water Hammer Analysis and Pipe Selection Longitudinal Section, Valves and Appurtenances
Day 4 (18-04-2019)	9.00 am to 12 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic : Water System Component
	1.00 pm to 4.00 pm	Expert talk by Dr. Leena A V Assistant Professor SNGCET Topic : Estimation and Rate
Day 5 (19-04-2019)	9.00 am to 12 pm	Expert talk by Mrs. Shilpa Valsakumar Assistant Professor SNGCET Topic : Construction Management - Site Mobilization and Laydown area Construction Activities
	1.00 pm to 4.00 pm	Expert talk by Mrs. Shilpa Valsakumar Assistant Professor SNGCET Topic : Valuation and Bill Payment - Quality Control

Report on Workshop on Advanced Design Techniques

Date: 15th April 2019 to 19th April 2019

Venue: CE Seminar Hall

Conducted by: Department of Civil Engineering

Faculty Coordinators: Mr. Akhil V and Mr. Abhishek C V

Student Coordinators: Ms. Jisna C P and Ms. Athira K V

The Advanced Design Techniques Workshop held at Sree Narayana Guru College of Engineering & Technology from 15th to 19th April 2019, conducted by the Department of Civil Engineering, was an insightful and enriching experience for all participants. Under the adept coordination of the faculty and student coordinators, the five-day workshop provided a comprehensive hands-on training session in water system design.

The workshop aimed to equip participants with practical skills and theoretical knowledge essential for designing efficient water systems. Through a structured curriculum and hands-on activities, participants delved into various aspects of water system design, including:

- Understanding water distribution networks.

- Designing pipelines and pumping systems.

- Hydraulic analysis and modeling.

- Sustainable water management practices.

Workshop Highlights:

Expert Guidance: The workshop benefitted greatly from the expertise of Mr. Akhil V and Mr. Abhishek C V, who provided valuable insights and guidance throughout the sessions. Their in-depth knowledge and experience in civil engineering enriched the learning experience for all participants.

Interactive Sessions: The workshop included interactive sessions where participants engaged in discussions, case studies, and problem-solving exercises. This interactive approach fostered a conducive learning environment and encouraged active participation from all attendees.

Hands-on Training: One of the standout features of the workshop was the hands-on training sections, where participants had the opportunity to apply theoretical concepts to real-world scenarios. This practical experience was invaluable in enhancing understanding and skill development.

Student Involvement: The involvement of student coordinators, Ms. Jisna C P and Ms. Athira K

**Dr. LEENA A. V.
PRINCIPAL**

**SREE NARAYANA GURU COLLEGE OF
ENGINEERING & TECHNOLOGY, PAYANUR
KANNUR**

V, played a crucial role in the success of the workshop. Their dedication, organization, and leadership skills ensured smooth proceedings and active engagement from participants.

Comprehensive Curriculum: The workshop covered a wide range of topics relevant to water system design, ensuring that participants gained a holistic understanding of the subject. From basic principles to advanced techniques, the curriculum was well-structured and comprehensive.

In conclusion, the Advanced Design Techniques Workshop at Sree Narayana Guru College of Engineering & Technology was a resounding success, thanks to the meticulous planning, expert guidance, and active participation of all stakeholders. Participants emerged from the workshop with enhanced skills, practical knowledge, and a deeper appreciation for the complexities of water system design. Such initiatives play a crucial role in preparing future engineers to address the challenges of sustainable water management effectively.
